A powerful combination of ZoomInfo's people and company search functionality and Oracle CRM On Demand.

Company Overview

Sakonent is a customer relationship management (CRM) 2.0 consultancy: we focus on the new generation of collaborative CRM solutions that can be deployed anywhere to deliver business value quickly, flexibly, and progressively. Though CRM platforms have grown robust and mature, some companies now view these platforms as commodities. Rather than focusing on the platforms themselves, we are defining new ways for clients to adopt and optimize the use of these platforms. Sakonent was founded in 2009 by a group of former "Big 4" CRM consulting executives who acquired a 10-year-old offshore CRM consulting practice. Using our collective experience as a springboard, we apply the best of traditional CRM consulting to the CRM 2.0 world for clients large and small.
