### *Provider of Microsoft Excel-based Automation Solutions*

*Global Software's Global Automation Suite is an innovative Microsoft Excel-based add-in that allows users to access live data within Excel while maintaining the full ability to drill down to supporting details.*

### **Company Overview**

Established in 1973, Global Software, Inc. is a privately held software company with worldwide corporate headquarters in Raleigh, North Carolina.

Building on more than three decades of a customer-centric philosophy, award-winning customer service, and leading-edge technology built on the latest development platforms, Global Software, Inc., has established itself as a leading worldwide provider of Microsoft Excel-based automation tools for over 40 enterprise resource planning (ERP) systems including Oracle E-Business Suite, Oracle's JD Edwards and PeopleSoft solutions, and many more.

### **Integration Overview**

Global Software's GlobalAutomation Suite Version 12 is an innovative Microsoft Excel-based add-in that allows users to access live Oracle E-Business Suite 12.1 data within Excel while maintaining the full ability to drill down to supporting details. Global Automation Suite enables users to leverage the familiarity of Excel as a reporting and analysis tool while providing up-to-the-minute dynamic data. Designed as a reporting automation tool, Global Automation Suite enables a one-way flow of desired data. This read-only solution alleviates IT concerns over data integrity and security of the underlying database. Built on a level of security defined in Oracle E-Business Suite, Global Automation Suite enforces segment and ledger security based on defined responsibilities of the Oracle E-Business Suite user.

Features offered by the integration include:

- Time savings
- Increased data integrity
- Increased leverage of the Excel environment
- Drill-down capabilities

### **Validated Integration**

#### **Oracle E-Business Suite**

**Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.**

## Integration Details

The key is to keep it simple. Global Automation Suite is the tool of choice because it's easy to use. Users of Global Automation Suite Server can simply open a spreadsheet and watch the cells of their spreadsheet populate with dynamic financial balances. With integrated security, following the Oracle E-Business Suite user responsibilities, report is simple, secure, and accurate. The unique drill-down capability takes the tool to a new level of detail by allowing the analysis of individual balances. With customization, the entire database of information is available to your Excel environment. Calculations are live and financial closing times can be cut significantly. Ad hoc reporting, based on your individual ledgers and Oracle E-Business Suite-defined segments, leaves behind configuration issues and allows analysts to focus on business.

## Environment

*Global Software, Inc.*

Global Automation Suite Version 12

*Oracle Environment*

Oracle E-Business Suite 12.1

Oracle Database 11g Release 11.2
