Company Overview

As an industry leader in integrated data management, IBM provides solutions that align the management of enterprise application data with business objectives to improve service levels, mitigate risk, and control costs. IBM Optim Solutions for Integrated Data Management offer proven integrated capabilities for managing enterprise application data, from requirements to retirement. Today organizations of all types leverage Optim solutions to improve performance, streamline database administration, speed application development, and enable effective governance. Optim solutions deliver better business outcomes at lower cost and with less risk while providing capabilities that scale across enterprise applications, databases, and platforms.

Integration Overview

IBM Optim Data Growth Solution for Oracle E-Business Suite version 6.0.3 delivers measurable benefits, enabling sites to control infrastructure costs and streamline application upgrades by archiving historical Oracle E-Business Suite 11.5.10 transactions. The result is a smaller database, which may help improve performance. Using the Optim Console, sites initiate archive and restore requests by specifying processing criteria such as transaction date or status. Optim applies application-specific functional condition checks, ensuring that each archived transaction record represents a historical reference snapshot of business activity. Sites can easily access, query, and report on archived records, using the familiar Oracle E-Business Suite interface.

Integration Details

The Optim solution integrates with Oracle E-Business Suite through Java and PL/SQL technology. Optim validates user access credentials via the Oracle E-Business Suite security framework. The archive or restore request is then initiated from the Optim Console. Once invoked, the archive and restore processes are performed by Optim on the Oracle E-Business Suite database to populate the archive environment.

Optim-specific objects are installed by use of Optim software. These objects integrate Optim with the Oracle E-Business Suite database and are needed to archive and

Validated Integration

Oracle E-Business Suite

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

retrieve data. Installing Optim does not affect objects that already exist in the Oracle E-Business Suite environment.

Program Request: GL: Balances Archive

Scheduled Date and Time: Immediate

Archive Description: Q4 Archive

Responsibility Name: General Ledger, Vision Operations (USA)

Period From: Dec-99(P)

Period To: Dec-01(P)

Submit Reset

Initiate an archive request by specifying criteria such as transaction data or status.

Accessing Archived Data

Sites may leverage different data access paths at different points in the archive lifecycle. To interact with archives maintained for long-term retention in content-addressed storage environments, sites may want to leverage Optim's application-independent access capabilities.
