*The Power to Translate Is Now Inside Oracle Universal Content Management*

### Company Overview

Lingotek | The Translation Network gives enterprise business customers new ways to engage their global communities by providing trusted, rapid translations to expand and grow business in a cost-effective way. We do this by using sophisticated translation technologies, workflow management, and community collaboration.

### Integration Overview

Now it's easy to quickly translate your content directly from Oracle Universal Content Management 11g using the new Lingotek – Inside for Oracle Universal Content Management 1.0 integration. Your users will be able to access translated content, nominate content for translation, and even offer to translate content themselves—all without leaving your site.

The Lingotek – Inside for Oracle Universal Content Management 1.0 integration has several value-added features.

- This integration provides a quick and efficient method for translating content without leaving the Oracle Universal Content Management site.
- Oracle Universal Content Management customers are multinational organizations in need of translation/localization solutions.
- Lingotek – Inside Oracle Universal Content Management integrates into the workflows of Oracle Universal Content Management.

### Validated Integration

#### Oracle Enterprise Manager

**Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.**

### Integration Details

The purpose of integration between Lingotek Inside 1.0 and Oracle Universal Content Management 11g is to introduce a simple way to translate content inside Oracle Universal Content Management. Most content has a lifecycle that should include translation. However, due to complexities in the process of transferring content and managing the translation workflow, translation is only done on a fraction of produced content. Oracle customers can now translate content inside Oracle Universal Content Management.

Once the content is selected for translation, the Lingotek Inside web services API is called, making various options for translation available including machine translation, community translation, and/or professional translation. The status of the project will be monitored from the Oracle Universal Content Management plug-in and the translated

document will be returned to Oracle Universal Content Management when the translation is complete.

TheLingotek Inside integration is developed as a plug-in to Oracle Universal Content Management. Inside the Content Actions is a Request Translation action. This action further requests a locale to target for the translation. The document is transferred via the Lingotek Inside API and the appropriate workflow (machine translation, community translation, and/or professional translation) is applied. Periodically, the Lingotek Collaborative Translation Platform will be queried by the Lingotek Inside plug-in to see if the document is completed. When the status changes to complete, the new document will be returned via API into Oracle Universal Content Management.

Lingotek's Translation Workbench.
