Effective decision making is vital to the success of any logistics organization. Oracle Transportation Intelligence (TI) Cloud, Oracle’s transportation-focused business intelligence solution, promotes better supply chain decisions by providing greater insight into both internal operations and trading partner performance. Oracle Transportation Intelligence Cloud provides you with the information needed to understand what's happening in your supply chain, so you can make corrections and achieve your organizational goals.

**Measure Performance, Monitor Trends, Take Action**

Setting and tracking goals within your transportation organization are keys to reducing costs and improving customer service. Oracle Transportation Intelligence Cloud leverages extensive transportation data from Oracle Transportation Management to provide detailed analysis of key transportation metrics – metrics that impact your organization’s profitability. Oracle Transportation Intelligence Cloud offers user-friendly dashboards that monitor key performance indicators while also allowing seamless navigation between historical and operational information – providing visibility into detailed causal data and leading to more informed operational decision making. In other words, the solution provides an organization with the ability to quickly analyze, adapt, and execute changes in day-to-day operations in order to improve performance.

Figure 1. Transportation metrics are defined, managed, and viewed through user-defined reports and dashboards.
Transportation Management Cloud platform

• Eliminate need to manage and maintain an independent data warehouse

**RELATED PRODUCTS**

Transportation Intelligence is a key component of Oracle Transportation Management Cloud and the Oracle suite of Logistics Cloud solutions.

Oracle Transportation Management Cloud was built to provide a single, complete solution to manage all aspects of transportation and logistics. The following options are also available with Oracle Transportation Management Cloud:

• Forwarding and Brokerage Operations Cloud
• Freight Payment, Billing, and Claims Cloud
• Transportation Intelligence Cloud
• Logistics Inventory Visibility Cloud
• Transportation Cooperative Routing Cloud
• Transportation Operational Planning Cloud
• Transportation Sourcing Cloud

**Defining Key Performance Indicators**

Oracle Transportation Intelligence Cloud offers the breadth and depth to provide visibility to the right measurements for your organization’s success. Transportation metrics can be defined for all relevant business needs. TI includes flexible analysis for:

- Orders, Shipments, Lines, and Stops
- Invoices and Invoice Lines
- Carrier Performance / Scorecards
- Sustainability
- Tracking Events
- Carrier Commitments
- Claims
- Quotes
- Drivers
- Planning and System Activity

**The Right Information, in the Right Place, for the Right User**

Oracle Transportation Intelligence Cloud provides the information needed to support a transportation executive’s long term objectives, a manager’s medium and short term goals, as well as a transportation analyst’s day-to-day decision making needs. Metrics, reports, and dashboards can be created and configured to support a variety of needs while data can be sliced and diced accordingly and can even be accessed via mobile devices. Transportation Intelligence provides embedded business intelligence into your operational transportation environment. It provides actionable insight, coordinated with fact-based decision support, together providing the knowledge needed to keep transportation operations moving in the right direction.
