

“Oracle’s Agile platform provides us with a single source of truth and enables us to demonstrate the necessary internal controls over our product records that we need to ensure regulatory compliance.”

David Rudzinsky, Senior Vice President, Information Systems and Chief Information Officer, Hologic

Case Study: Hologic

Hologic is a leading developer, manufacturer, and supplier of premium diagnostics, medical imaging systems and surgical products. Hologic adopted Agile PLM to reduce engineering change order cycle time, automate the ECO system to reduce overhead costs, integrate the ECO system with their existing Oracle’s manufacturing resource planning (MRP) and enterprise resource planning (ERP) systems, and to ensure compliance with FDA regulations.

With Agile PLM, Hologic was able to:

- Accelerate execution of product enhancements and design changes
- Ensured compliance with industry and financial regulations
- Reduce the ECO cycle time from 40 days to 4 days
- Reduce overhead costs by eliminating expensive paper-based processes
