

“Agile provides us with the advanced engineering and collaboration features that will ensure we continue to be at the forefront of wireless technology.”

**-Norm Fjeldheim, Sr. Vice President
and Chief Information Officer,
QUALCOMM**

Case Study: QUALCOMM

QUALCOMM Incorporated is the largest fabless semiconductor company in the world. QUALCOMM develops and delivers innovative digital wireless communication products and services worldwide, QUALCOMM adopted Agile PLM in order to improve slow product development due to scattered product information, lower the costs of data integration failures and errors, and to create a system with user-specific secure, regulated, global access to data.

With Agile PLM, QUALCOMM was able to:

- Ensure regulatory compliance with secure product data and enhanced history tracking
- Reduce cycle time from days to minutes for data iterations with contract manufacturers
- Save money and time by eliminating suspect data, failures and errors with one true source for all product information
- Provide global 24/7 accessibility to product information.
