

ORACLE GRANTS MANAGEMENT CLOUD

Receiving grant and contract funding in today's environment requires those that receive funds to have absolute control and visibility into how the funds are used to support their sponsored projects and programs. Whether you are an institution of higher education, a government agency, or a non-profit organization, the proper management of your grants is essential to ensuring the continuation of this important revenue stream.

COMPLETE CONTROL AND COMPLIANCE FOR ALL AWARDS

KEY FEATURES

- Innovative analytics that clearly portray the current spending status of each award
- Calculate, apply, adjust, account, and invoice indirect costs at institution, department, or award specific rates
- Prevent overspending by checking budgets at the point of entry
- Collaborate on Award specific topics utilizing the Oracle Social Network
- Invoice sponsors in their desired format or through a letter of credit
- Comprehensive reporting platform to track all award funding, expenditures and other related activity
- Fund projects from multiple awards

KEY BENEFITS

- Decrease time staff spends on award administration
- Faster visibility into award financial status
- Comply with sponsor and internal control, billing and reporting requirements
- Analyze award funding and performance

Grants Management at Your Fingertips

Oracle® Grants Management Cloud allows you to manage the complete post award process, from initial funding to close out. Oracle Grants Management Cloud also provides an integrated platform for managing the financial aspects, and collaborating on your awards and sponsored projects while complying with your sponsors and internal control, billing and reporting requirements.

Figure 1. Quickly visualize current award spending status and important action items

Oracle Grants Management Cloud allows you to have complete visibility into the all aspects of your awards. Quickly visualize the current spending status and drill into funding, budget, commitment, and expenditure details, as well as all related conversations and documents; all from any device, anywhere.

Build and access analytics and reports on award and sponsored project related activity using a comprehensive, user friendly business intelligence platform. Embed analytics within transactional pages, or view as a dashboard on any screen.

Hands-off Administration, Manage by Exception

Oracle Grants Management Cloud takes care of the details and allows resources to focus on strategic initiatives. Role specific, extensible work areas and watch lists alert users to items requiring their attention, while providing quick and easy access to all relevant information about awards, costs, revenue and invoices when those details are required.

Quickly create awards from predefined templates, or using standard web services and open interfaces. Preview and add funding for each period and sponsored project using an interactive funding matrix. Validate the award definition to ensure setup is complete.

Figure 2. Easily add new funding by period and project

Be confident that only allowable cost categories are being charged and budgets are not overspent. Oracle Grants Management Cloud proactively identifies cost control issues and notifies users immediately. Indirect cost is automatically added to committed and actual costs and is included when ensuring transactions do not exceed budget.

ORACLE PPM CLOUD PRODUCTS

Oracle Project Portfolio Management Cloud is a complete PPM solution that includes the following products:

- Oracle Project Financials Cloud
- Oracle Project Contract Billing Cloud
- Oracle Grants Management Cloud
- Oracle Project Resource Management Cloud
- Oracle Project Management Cloud
- Oracle Task Management Cloud
- Oracle Transactional Business Intelligence for Projects Cloud

Analyze Your Grant Performance in Real-Time

Oracle Grants Management Cloud delivers real-time reporting capabilities that make it easy for administrators to stay on top of the performance of their organizations. The predefined multi-dimensional ad-hoc reporting platform allows for end users to create, generate and publish the types of reports that their stakeholders require. From reporting on funding by department and source over time, to analyzing awards closing in the near term versus the historical average; all types of end users will benefit from the ability to enhance their job performance with analytics.

Don't Compromise Your Project Management

Oracle Grants Management Cloud is built in strategic conjunction with Oracle Fusion Project Portfolio Management. This allows for uncompromised management and control of your sponsored and nonsponsored projects.

Awards are defined independently of projects, allowing for all types of sponsor specific information to be captured including; award type and purpose, owning institution and department, keywords, CFDA numbers, terms and conditions, certification requirements, and sponsor or award specific indirect cost rates. Proper accounting is ensured by specifying account rules based on award attributes, to generate account journals for both direct and indirect costs. Award attributes can also be used to effectively route approvals of sponsored project expense reports, requisitions, and purchase orders to appropriate personnel.

Grants administrators can assign and fund one project from multiple awards and funding sources, whether external customers, internal organizations or user-defined. Associating sponsored projects to multiple awards and funding sources allows for increased flexibility to manage different overhead rates, different funding periods, manage budgets, and control costs efficiently for each award and project combination.

Manage your projects efficiently and effectively utilizing the full breadth of the Oracle Project Portfolio Management Cloud. From defining and capitalizing assets, to scheduling and collaborating on project work, your project management and accounting needs are available regardless of the source of funding for the project.

External Data Integration Services for Oracle Cloud

Oracle Project Portfolio Management Cloud offers External Data Integration Services for Oracle Cloud to enable external data integration infrastructure and services. This integration supports file-based data load from legacy or third-party applications to batch interfaces on the Oracle Cloud, allowing you to import high volumes of data.

Complete Grant and Project Portfolio Management

Oracle Grants Management Cloud is delivered as part of the Oracle Project Portfolio Management Cloud family of solutions, which are fully integrated with other Oracle Cloud applications. Oracle Cloud Applications are completely open, standards-based enterprise applications that can be easily integrated into a service-oriented architecture.

Oracle's solutions work together for comprehensive grant and project financial management, including budgeting, cost management, billing and accounting, so you can reduce processing time, eliminate integration costs and close the books faster,

leveraging the power of a single source of grant and project truth.

Additionally, combining Oracle Grants Management Cloud with project execution solutions including Oracle Project Management Cloud, Oracle Project Resource Management Cloud and Oracle Task Management Cloud, delivers a powerful best-in-class business flow across the full project lifecycle.

Oracle Grants Management Cloud dramatically improves the way grant funded organizations and professionals work, with social capabilities embedded throughout to ensure secure consistent communication for the project team, wherever they may be, for improved productivity and project delivery success.
