

# Keep Your Competitive Edge – Build Your Digital Business – Deploy JD Edwards on Oracle Cloud

Achieve agility, maintain control, make your own choices

## Increase Business Agility

Achieve your business goals with the right cloud deployment options:

- Go hybrid (public cloud, private cloud, on-premises).

Speed up time to market:

- Decrease time to develop new line of business.
- Decrease time to integrate acquisitions into your enterprise.

## Accelerate Deployment

Accelerate upgrade decisions and processes.

- Deploy JD Edwards on Oracle Cloud Infrastructure in just hours and explore new applications, new tools and technology.

Reduce complexity:

- Quickly deploy your JD Edwards instances – development, test, production.
- Easily migrate your configurations to the cloud.

## Maximize Your Resources

Focus on innovation.

Evolve IT by doing more with less and creating competitive advantage.

Automate your data capture with IoT Cloud Service and JDE Orchestrator.

Manage your enterprise mobile processes with Mobile Cloud Service and JDE Mobile Applications.

## Maximize Value

Use your existing JD Edwards license in Oracle Cloud Infrastructure.

Elastic compute - pay for the computing power you need – when you need it.

Subscribe to platform services that you need.

Don't pay for and maintain your own hardware.
