

JD Edwards EnterpriseOne One View for Health and Safety Incident Management

ORACLE®
JD Edwards
EnterpriseOne

KEY FEATURES AND BENEFITS

- Empowers end users to design, create, run, and share reports to meet business needs
- Intuitive and powerful process that does not require complex skills
- Reduce the backlog of user requested reports with IT
- Enhanced real-time decision-making through the use of interactive reports with lists, charts, graphs, and tables
- Intuitive, user-friendly reports designed to improve business productivity
- Easy access to any level of detail required to make informed business decisions using drill-down capabilities
- Real-time access to critical operational data
- Visibility into business information directly from JD Edwards applications
- Single reporting solution for all JD Edwards modules and custom applications
- Embedded administration and management of reports

Access to real-time data in an easy-to-consume format is no longer a luxury for employees; it is a necessity and an essential part of achieving operational excellence. One View Reporting enables users to access and personalize transaction data into lists, charts, graphs, and tables, thus simplifying the consumption of information. Casual and power users alike will appreciate the simple yet robust, integrated reporting with all JD Edwards EnterpriseOne applications.

The JD Edwards EnterpriseOne reporting capabilities are designed to deliver personalized access to information critical to your business processes. One View Reporting is all about delivering the right data to the right person, right now. Clear and concise views over operational activities lead to more effective decision making and improved productivity. One View Reporting's intuitive interface empowers end users with the flexibility to create personalized transactional reports without the need for IT assistance.

One View Reporting For Health and Safety Incident Management

One View for Health and Safety Incident Management provides insight across your incidents to facilitate decision-making and process changes to help reduce or eliminate

occupational incidents. Users have the choice and flexibility of reporting based on core incident attributes and costs, frequency rates, impact rates, and other key metrics, as well as the capability to dive deeper into the details for incidents involving people, their injuries and illnesses, equipment and property damages, incidents involving motor vehicles, and the environmental impact of incidents. Evaluate incidents across establishments, companies, business units, projects, and even contractors. Analysis of incidents is available for a myriad of dimensions and attributes such as potential incidents, security, and other types of incidents such as fire or explosion. Additionally, One View for Health and Safety Incident Management provides analysis related to the responsibility for incidents—whether it be third party or company. Safety officers can easily see where incidents are occurring and look for other important trends. Management can compare incidents for past periods, and see how incidents rates are changing as processes and procedures are improved based on the insight gleaned.

One View for Health and Safety Incident Management delivers five specialized applications, each focused on an important dimension with a set of 15 high-value reports to give organizations the information they need to take meaningful action. Reports include incident summaries based on attributes and costs, environmental impact analysis, incidents involving people, injured people summaries, reportable cases analysis, motor vehicle and non-motor vehicle summaries, property and equipment analysis, incident metrics, and many more.

JD Edwards EnterpriseOne One View Reporting

JD Edwards EnterpriseOne One View Reporting enables end users to access data from simple to sophisticated reports using JD Edwards EnterpriseOne interactive applications with Oracle BI Publisher layout reporting and distribution features. One View Applications combine essential transaction data and master data, including associated descriptions and category codes, previously not available. Users can view data in the exact layout they want using all the advanced capabilities of Oracle BI Publisher. One View Reporting provides a large library of predefined reports designed to answer the most common business questions. Delivered reports can be personalized by end users as needed and additional reports can be defined without IT support. The complexity of data models, table joins, and business views are masked from the end user to ensure intuitive reporting experiences. One View Reporting provides users a simplified and clear view of the essential data necessary to effectively execute business processes.

The power of One View Reporting comes from the extensive number of applications, reports and report components. These solutions address the most common and highly demanded business questions, enabling you to realize value from day one.
