

## PEOPLESOFT MOBILE APPROVAL

### KEY FEATURES

- Mass approval capability
- Embedded transactional intelligence guide approvers' decisions
- Out-of-the box integration
- Visibility to attachments/comments

### KEY BENEFITS

- Simplified and quick approval process
- Greater accuracy and compliance with organization policies
- Increased efficiency in managing workload and alerts.

*PeopleSoft Mobile Approvals improves productivity and keeps business moving forward when your users are on the go without comprising business imperatives and operational policies. PeopleSoft Mobile Approvals enables your users to approve transactions through the desktop, smart phones or tablet devices. This will speed up the approval process thus avoiding potential late payment penalties and support early payment discounts for invoices. This innovative solution is delivered using the latest HTML 5 technology to allow customers to manage their critical tasks anytime through any device.*

For more information, please watch the Video Feature Overviews (VFO) available on YouTube (links below) or contact your application sales representative.

### Streamline Approval Processing, Reduce Costs and Ensure Compliance

PeopleSoft Mobile Approvals provides your organization with the tools to effectively manage the approval process. PeopleSoft Mobile Approvals lets you approve, deny, reject transaction either individually or en masse. It works in conjunction with PeopleSoft Accounts Payable, eProcurement, Purchasing, Expenses and General Ledger where users can easily transition from desktop to mobile device as needed to approve transactions anywhere.

With a breakthrough UI and embedded analytical data, users can manage the approval work through the ability to filter their set of work so that priorities are identified.

PeopleSoft Mobile Approvals provides access to transactions, risk level, attachments that support the transaction being approved and alerts to ensure compliance. This solution makes the approval process faster, increases user satisfaction and without compromising on compliance.

## Improve Employee Productivity

The key to managing an organization's approval process is having accurate information at hand to approve financial activity. PeopleSoft Mobile Approvals integrates directly with PeopleSoft Expenses, Accounts Payable, General Ledger, eProcurement and Purchasing, providing a central place for the user to approve transactions with ease. Faster approval processing also means that they can avoid late payment penalties and get early payment discounts and improve supplier relations.

## Adapt to Rapidly Changing Mobile Technology

### Use the Mobile Devices to Fit Your Needs

PeopleSoft Mobile Approvals is device independent when it comes to interface rendering and layout. This capability is important because companies can support multiple devices. Any computer or handheld device (e.g. Smartphone, tablet, etc) running an OS platform that supports HTML 5 can be used. Other than an icon placed on the mobile device's screen to access the PeopleSoft Mobile Applications, there is no application code installed on the device. Along with support for a wide variety of mobile devices, these capabilities will help customer IT departments to minimize support calls to troubleshoot various devices, applications, etc.

### Deployment Options and Requirements

The application logic runs on a Java-based middle tier and in the database, eliminating application code on the device and permitting the use of a wide variety of mobile devices from multiple vendors. In addition, the application runs on any PC or handheld device that can run internet browser compatible with HTML 5. Because PeopleSoft Mobile Approvals is built into the PeopleSoft ERP application, it leverages the Approval Workflow Engine already delivered as a common function in release 9.1. Mobile Approvals provides an alternative, execution-

based UI but does not add further complexity or overhead to existing processes. Therefore, users can select how they want to approve their day-to-day tasks. The PeopleSoft Mobile solutions require People Tools 8.52 or higher.

### PeopleSoft Mobile Solutions

PeopleSoft Mobile application include Mobile Expenses, Mobile eProcurement, Mobile Approvals and are designed as a complete suite of modular applications, to help you improve performance, lower IT costs, and get better results. Whether you choose to use one module, or more, PeopleSoft Mobile enables you to reduce cost, and streamline processes to matches your business needs.
