Oracle Contract Management Cloud

Get Organized, Get Coordinated, Get STARTED!

ORACLE
PRIMAVERA

With over 25 + years of industry leading know how behind it, contract management has never been this simple, fast or affordable. Is your project starting soon? Do you need a pre-configured solution that can get you and your project teams organized & coordinated quickly? Do you need immediate access to best practices and business processes that will get and keep your projects on track? Do you have no time or money to waste in getting started? Then look no further than Oracle's Contract Management Cloud …purpose built for Engineering & Construction.

Contract Management in the Cloud

If you're a project controls pro then you already know the difference between the back, the front and the field office. It's as simple as the shoes on your feet. You also know that project success = business success and that a poorly coordinated project can kill any good business when left unattended. So how do you protect what is truly the lifeblood of the company… "executing projects"…at the level where the work actually happens? While at the same time making that work collectively visible up the food chain across the business? And what if you don't have the time, money or skills in house to quickly put all that technological infrastructure in place to support the project where the true margin is at risk?

The cloud can change all that. Take away the headache of IT. The pain of having to wait. The complexity of creating and deploying business processes and best practices that have already been in use elsewhere. The Oracle Contract Management Cloud pre-builds the puzzle instead of coming as a box of pieces for you to have to put together. But even better, because it's more cost effective, it allows you to include more participants…and that enhanced collaboration is a critical factor every successful project will attest to.

Key Benefits of Oracle Contract Management in the Cloud

Good decisions rarely emerge from false consensus. Good decisions require that experience be brought to bear. With over 25+ years of supporting engineering & construction contracts, our cloud solution is jam packed with just what you need to work smart, plus give you room to grow:

ORACLE

» Pre-configured solution

» Industry standard reports & forms

» Contract documentation & controls

» Project cost management & change control

» Audit & administration

» Purpose built for Engineering & Construction

Pre-configured solution

» Pre-built folders, forms, business processes and reports are just the jump start you need to get teams organized and coordinated quickly.

» If you liked Primavera Contract Management, this will feel like home…a home with upgrades you have wanted for a long time.

» Pre-configured means you can scale quickly by taking what's available and then extending it to suit your needs, on your own, or with added starter packs to help.

Industry standard reports and forms

» Standard reports and forms for the way engineering and construction works

» Gain adoption quickly because there is less to modify

Contract documentation & controls

» Being prepared to handle disputes requires a well kept project book of all construction documents from RFI's to Submittals, to Drawings, to Meeting Minutes, to Change Orders, the list goes on. Pre-configured folder structures get you organized fast and still allows you to create additional ones to suit your needs…making sure everything get's tracked, secured, cataloged and managed.

Project cost management & change control

» Any seasoned controls pro will tell you that project cost management is fundamentally different than what the finance system does.

» Take advantage of deeper bi-directional schedule integration so all parties and disciplines are immediately informed of impacts.

» Pre-built change management processes and cashflow analysis to help the project teams protect the margin, deliver on commitments and perform.

Audit & administration

» Want better project execution behavior? How about full audit trail capability with date and time stamps so you can always discover who touched what when.

» Think administration is a hassle? Not anymore. Gain a true enterprise admin with the ability to delegate administration at any hierarchical level you choose. Let those who manage the work really do it.

Get started today

If you love your projects, there has never been a better time to help protect them then right now. The Oracle Contract Management Cloud …give your projects what they have been waiting for.
