

# ORACLE E-BUSINESS SUITE SINGLE SIGN-ON SOLUTION

## Oracle Expert Services

### AT A GLANCE

- Scope and project planning
- Analysis and design of deployment architecture and strategy
- Implementation of a production-ready solution
- Information transfer activities
- Production support activities

*The Oracle E-Business Suite Single Sign-On Solution integrates Oracle E-Business Suite with Oracle Identity Management and other components of Oracle Application Server 10g, a key component of Oracle Fusion Middleware. Providing single sign-on access to Oracle Applications, this offering leverages the security benefits and features of the Oracle Identity Management Security Platform and Oracle Application Server 10g. The five-day, quick-start workshop is geared towards providing a better understanding of the security requirements of your Oracle E-Business Suite deployment, reviewing your Oracle E-Business Suite solution and the supported integration, and demonstrating the technical solution in a limited development environment.*

### Overview

The Oracle E-Business Suite Single Sign-On Solution is a five-day workshop designed to provide you with a well-planned, production-ready deployment to integrate Oracle E-Business Suite with Oracle Identity Management and other components of Oracle Application Server 10g. It begins on the business side—discussing your goals, drivers, requirements, and strategy in the area of identity management—and concludes with the technical components—identifying the gaps and potential risks in your current architecture. The resulting information allows you to establish a plan to best deploy and architect your enterprise application security architecture.

Oracle consultants have the experience to help you to understand your business requirements and the expertise to map them into the appropriate architecture to meet your identity management integration needs, following Oracle and other industry practices. We perform this service in a development environment that you can leverage for validating business and technical requirements.

### Scope of the Offering

This service offering provides a production-ready, highly available infrastructure for integrated single sign-on access to Oracle E-Business Suite applications, along with a robust portal and business intelligence framework to manage information. Centralized user management and single sign-on systems can leverage this infrastructure as part of regulatory compliance requirements.

### Requirements

- Supported development environment for Oracle Identity Management Suite

with pre-installed software

- Pre-installation of Oracle E-Business Suite with all required pre-requisite patches for Oracle Identity Management integration solution
- Pre-installation of any third-party identity and directory tools such as Microsoft Active Directory or access management software that supports integration with Oracle Identity Management Suite
- Other system requirements also apply, please contact Oracle Consulting for further details

### Deliverables

- **Workshops:** Our security professionals lead half-day workshops to discuss the alignment of your organization and to gather requirements around Oracle E-Business Suite security use cases.
- **Deployment and Demonstration:** Integrate and demonstrate single sign-on into Oracle E-Business Suite.
- **Presentation and Roadmap:** The Oracle consultant will present the findings in person to a limited audience (determined prior to the engagement) at your facility.
