ORACLE BIG DATA BLUEPRINT AND ASSESSMENT SERVICE

Oracle Big Data solutions are a key part of the success of your organization. Naturally, you want to ensure your organization realizes the highest value from your investment – now and in the future.

Over time, organizations change and evolve with new demands for information, tighter time frames, an expanding numbers of people seeking information and changes in underlying technology requirements. As these changes and requirements accumulate, analytical solutions originally designed to meet your organizations business requirements may no longer align with your current or future requirements. In order to get the highest level of business value and maximize the return on your investment your Oracle Big Data solution needs to evolve with your business. This 5-week service will transform your Big Data requirements into an architectural blueprint and delivery roadmap.

Solution

Oracle Consulting will help you streamline optimization efforts by providing a realistic assessment of the current state of your Oracle Big Data technology and applications. Utilizing a blended team of Oracle Architects and specific subject matter experts, this service provides a comprehensive architectural blueprint and delivery roadmap for Big Data. Utilizing functional, integration and infrastructure expertise, we evaluate the major functional and technical aspects of your Oracle Big Data infrastructure and business processes. Our assessment focuses on indentifying the gaps between your current and future requirements and your current big data deployments. We follow a proven assessment methodology:

• **Scope Definition:** To ensure the most cost-effective approach, we work with you to determine exactly which big data technology, application(s) and processes will be reviewed as part of the blueprint & assessment. A typical assessment takes five (5) weeks but is ultimately driven by the number and complexity of solutions to be reviewed.

• **Customer Questionnaires and Workshops:** Based on the scope of the blueprint and assessment, we leverage our proprietary questionnaires in conjunction with our onsite workshops to assess your big data solution’s current state and future desired state. The completed questionnaires in conjunction with the workshop output provide Oracle Consulting with the information needed to develop an effective blueprint and roadmap recommendation.

• **Blueprint and Assessment Report:** Based on the information gathered, Oracle Consulting will produce a Blueprint and Assessment Report. This report details our findings and its resulting recommendations will help you effectively unlock the value of your Oracle Big Data solution.
Scope

- **Week 1 Activities:**
  - Mobilization, scope and joint execution plan
  - Discovery workshops
