Given the rapidly changing pace of business, with global markets leading to increased competition and growing customer expectations – the need to bring new products and services to market quickly has never been greater. In this environment, companies need to be empowered to change and adapt their business models quickly. The Oracle Application Integration Architecture (AIA) introduces a new approach to integrating your application portfolio with a best-in-class, Service-Oriented Architecture (SOA) based set of building blocks.

The Oracle Business Process (AIA) Discovery Workshop leverages Oracle’s leading edge experience in both enterprise Business Applications and Middleware to analyse your key business processes in the context of your applications and technology environment. Using this approach, we help define the benefits that can be received through implementing Oracle’s Application Integration Architecture.

Overview
For many companies, it can be a challenge to understand, rationalize, and respond in real time to business processes change, in order to meet business needs today and over time. Oracle helps eliminate this challenge by delivering industry best practices through Oracle’s Application Integration Architecture (AIA). The end result is a solution that provides key business advantages:

- Business Process Flexibility
- End-to-End Business Process Management
- Sustainable Best of Breed Integrations
- Based on Service-Oriented Architecture (SOA)
- Foundation for Innovation

Scope of the Offering
The Oracle Business Process (AIA) Discovery Workshop provides a perfect setting for both business and IT professionals to learn more about the possibilities of Oracle AIA within your organization. The workshop is structured to meet the specific needs of each customer, and can be tailored to deliver one or both of the components outlined below:

Oracle AIA Architecture Assessment
The Oracle AIA Architecture Assessment addresses your IT technology and applications landscape and related business issues. Oracle Experts will work with
ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in providing best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive upgrade approach resulting in project success

your business subject matter experts and IT architects to determine how the Oracle AIA framework can be leveraged to drive business process improvement. The outcome is an Assessment Analysis Report that captures the applications and architectural details, and provides a statement of direction on Oracle AIA usage and applicability to your IT and business environment.

Oracle AIA Implementation Scoping Assessment

The Oracle AIA Implementation Scoping Assessment focuses on analysing select business processes where integration challenges exist. Based upon identified business objectives and the business process analysis, Oracle Experts will recommend improvements that can be delivered through Oracle’s AIA Foundation Pack or Process Integration Pack (PIP). A gap analysis is also performed to gauge the scope and implementation effort required.

Major Deliverables

The main deliverables included in this service are:

- Introductory session on the features and benefits of the Oracle Application Integration Architecture (AIA) solution
- Identification of integration requirements and architectural and business process weaknesses currently impacting your company’s business that can be solved with Oracle’s Application Integration Architecture solutions
- Process Integration Pack (PIP) Gap Analysis report
- Phased Oracle AIA adoption plan including Scope and Effort Analysis
- Recommendations for leveraging and migrating to an Oracle AIA Architecture

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.
