Is your organization struggling to deploy Oracle databases at the pace demanded by your business stakeholders, customers, and competitors? The Oracle Consulting Rapid Start for Oracle Database Cloud Service provides a complete environment for deploying and managing Oracle databases in the cloud. The Oracle Consulting Rapid Start for Oracle Database Cloud Service was created to help organizations accelerate their adoption of the Oracle Database Cloud Service including establishing familiarity with deployment and management capabilities as well as database migration strategies. Oracle Consulting Experts provide guidance, proven methodologies, and best practices for deploying to the Oracle Database Cloud Service.

KEY FEATURES
• Rapid approach to jump start your transition to the Oracle Database Cloud Service
• Best practices established in your IT Organization for migrating databases to the Oracle Database Cloud Service
• Establishes operational best practices within the Oracle Database Cloud Service

KEY BENEFITS
• Accelerated and cost-effective way to initiate on-boarding to the Oracle Database Cloud Service
• Oracle’s proven methodology and best practices for migrating and managing databases in the Oracle Database Cloud Service
• Focus on knowledge sharing prepares your IT teams for future migration successes

Onboard to the Cloud with Oracle Expertise

Oracle Consulting can help you realize the value of cloud computing faster and with less risk by leveraging our extensive experience, Oracle best practices and proven delivery approach. Oracle Consulting will lead the engagement working with your IT Team to provide a comprehensive introduction to the Oracle Database Cloud Service. Key focus areas will include initial configuration, provisioning, account setup and security, monitoring, and management of your Database Cloud Service environment. The engagement will include selection of a candidate non-production Oracle 11gR2 or 12cR1 database for migration, defining a target configuration to support the database, provisioning of the Oracle Database Cloud Service environment, and migration of the selected database to the Oracle Database Cloud Service. The engagement is concluded by reviewing the operational and management features of the Oracle Database Cloud Service with your IT Team. This engagement will provide your team with the knowledge, processes, and skills to enable future database deployment to the Database Cloud Service.

Key Deliverables:
• Workshop to review Oracle Database Cloud Service capabilities, options and implications when provisioning and managing Oracle Database Cloud Service environments including management and monitoring, high availability, scheduled backups, restore and patching tools.
• Workshop to review approaches and strategies for data movement from your existing databases to the Oracle Database Cloud Service
