ORACLE BUSINESS INTELLIGENCE ENTERPRISE EDITION ASSESSMENT SERVICE

Your Oracle Business Intelligence Enterprise Edition (OBIEE) solution is a key part of the success of your organization. Businesses are undergoing a fundamental shift in the way they make decisions. In today’s rapidly changing environment, decision-making occurs more frequently and at all levels of an organization. Having access to your company’s crucial information and using that business intelligence to achieve strategic enterprise-wide objectives differentiates highly successful businesses from potential competitors.

The Solution – Oracle Business Intelligence Enterprise Edition Assessment Service

Oracle Consulting can help you streamline your optimization efforts by providing a realistic assessment of the current state of your solution. Utilizing our functional, integration and infrastructure expertise, Oracle Business Intelligence Enterprise Edition Assessment Service evaluates the major functional and technical aspects of your OBIEE infrastructure and business processes. Oracle focuses on indentifying the gaps between your current and future requirements and your current application deployments. We follow a proven assessment methodology:

• **Scope Definition**: To ensure the most cost-effective approach, we work with you to determine exactly which application(s) and processes developed using Oracle Business Intelligence Enterprise Edition will be reviewed as part of the assessment. We provide your team with the appropriate assessment check-list(s) based on the Oracle Business Intelligence Enterprise Edition functionality to be reviewed including, the underlying technical parts of the Oracle Business Intelligence Enterprise Edition solution. A typical assessment takes two (2) weeks but is ultimately driven by the number and complexity of the solutions to be reviewed.

• **Customer Questionnaires and Workshops**: Based on the scope of the assessment, we leverage our proprietary questionnaires in conjunction with our onsite workshops to assess your solution’s current state. This is a “triage” exercise designed to identify and prioritize any perceived or existing solution challenges. The completed questionnaires in conjunction with the workshop output provide Oracle Consulting with the information needed to develop an effective recommendation.

• **Assessment Report**: Based on the information gathered, Oracle Consulting will produce an Assessment Report. The report details our findings, including any current challenges, gaps and configuration elements that may prevent you from realizing the full value of your applications developed using Oracle Business Intelligence Enterprise Edition. We identify high-impact areas and provide recommendations to effectively address any application, integration or infrastructure changes that could be deployed. The assessment and resulting recommendations will help you effectively unlock the value of your Oracle Business Intelligence Enterprise Edition implementation.
WHY ORACLE CONSULTING

- Leading Expertise: Oracle’s own experts providing thought leadership for every Oracle solution.
