ORACLE BUSINESS INTELLIGENCE PERFORMANCE ASSESSMENT

Is your Oracle Business Intelligence Enterprise Edition (OBIEE) implementation performing to your expectations? Would you like to improve the operational characteristics of your OBIEE environment by taking advantage of performance enhancing features available in OBIEE, Oracle Database 11g, and Oracle Exadata V2? The Oracle Business Intelligence Performance Assessment can help you increase your success and return on investment in Oracle Technology by identifying opportunities for performance improvement that are specifically tailored to your technical environment.

Overview

Oracle Consulting offers a comprehensive review of your existing Business Intelligence (BI) environment, helping you:

- Gain an objective assessment of the strengths and weaknesses of your OBIEE implementation.
- Benefit from Oracle best practices for exploiting the latest BI and data management technologies.

Our experienced consultants will work with your team to determine which performance enhancing features of OBIEE like efficient data sourcing and aggregation, connection pooling, query reuse and caching, clustering, load balancing, and custom memory heap management would benefit your environment. We will examine your Data Warehouse and its underlying database instances in order to exploit the capabilities of Oracle Exadata V2 and Oracle Database 11g features such as indexing, advanced compression, materialized views, star transformation, and query rewrite. All activities are focused on identifying specific recommendations that will help your BI environment to perform and exceed business expectations.

Scope of the Offering

Oracle consultants will work with your team to conduct a series of tests that examine your current OBIEE infrastructure, environment setup, repository configuration as well as your Data Warehouse. Testing will use a representative set of your reports and ad-hoc requests to identify and explain any existing performance issues. You will receive documentation of all finding and recommendations to enhance the performance of your environment.

The Oracle Business Intelligence Performance Assessment includes:

- Interviews with key personnel from IT and business
WHY ORACLE CONSULTING

• Leading Expertise: Oracle’s own experts providing thought leadership for every Oracle solution.
• Broad Coverage: “End-to-end” lifecycle services across the entire Oracle product footprint.
• Global Scale: 13,000 Oracle experts in 145 countries, serving over 20 million users.
• Unified Methodology: Based on industry standards, high quality results across complex projects.
• Flexible Delivery: Onsite, offsite, and offshore, along with innovative solutions such as Rapid Starts and Expert Services.

• Review of your current OBIEE infrastructure and environment setup, and suggest improvements. Review of your OBIEE repository design and configuration.
• Analysis of a sample set of dashboard reports and ad-hoc requests that are representative of your current performance issues.
• High-level review of the Oracle Database instances used by your Data Warehouse and business intelligence applications and recommendations of I/O reduction features to enhance their performance.
• Documented results, including suggestions for enhancing the performance characteristics of your Business Intelligence and data warehouse environments.

Benefits

Customers that take advantage of the Oracle Business Intelligence Performance Assessment receive an objective review, conducted by experienced consultants with experience gained from many of Oracle’s largest BI implementations. Oracle Consulting will document and present our recommendations for improving your OBIEE infrastructure, setup, repository configuration, including alternatives and improvements that may be realized using Oracle Database 11g, and Oracle Exadata V2.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle’s methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
