- Oracle SOA Staff Enablement Service

*Would you like to integrate, orchestrate, monitor and manage your heterogeneous business applications effectively and quickly based on the best architectural approaches offered by Oracle's Service-Oriented Architecture (SOA) Suite? Would you like to accelerate adoption and rollout of SOA Suite based projects across your organization, while still exploiting the full potential of Oracle's enterprise strength middleware platform? Would you like Oracle Experts to analyze your integration challenges and suggest an implementation approach to solving it using the Oracle SOA Suite product set and best practices? If yes, the Oracle SOA Suite Rapid Start is exactly what you are looking for.*

## Overview

Developing a reliable infrastructure that is based on open standards and follows the principles of SOA allows organizations to flexibly adapt their applications environment to new requirements. Moreover, a standards-based architecture helps an organization automate its business processes and react more quickly to changing needs, thereby lowering costs.

The Oracle SOA Suite consists of Oracle's most popular, "best-of-breed" middleware products including (but not limited to); Oracle JDeveloper, Oracle BPEL Process Manager, Oracle Service Bus, Oracle Web Services Manager, Oracle Business Rules and Oracle Business Activity Monitoring (BAM). The Oracle SOA Suite Rapid Start Service will help you become familiar with the features, functions and underlying technologies of the Oracle SOA Suite product set.

The Oracle SOA Suite Rapid Start not only educates your staff around installation, configuration and administration recommendations but also imparts Oracle's best practices and methodologies to design, implement and rollout enterprise strength SOA infrastructure, based on Oracle's SOA Suite product set.

Upon completion of the Oracle SOA Suite Rapid Start, your team will be able to leverage the reference installation performed by Oracle Experts and build a complete, open and agile integration solution for orchestrating user-centric business processes across your enterprise applications.

## Scope of the Offering

The Oracle SOA Suite Rapid Start has been designed to address two levels of customer needs. Both service components will be tailored depending on customer requirements. The duration and staffing for each is typically guided by the inventory of products owned by the customer and/or the number of products planned for use by the customer for a given project/phase.

**WHY ORACLE CONSULTING**

- **Leading Expertise:** Oracle's own experts providing thought leadership for every Oracle solution.
- **Broad Coverage:** "End-to-end" lifecycle services across the entire Oracle product footprint.
- **Global Scale:** 13,000 Oracle experts in 145 countries, serving over 20 million users.
- **Unified Methodology:** Based on industry standards, high quality results across complex projects.
- **Flexible Delivery:** Onsite, offsite, and offshore, along with innovative solutions such as Rapid Starts and Expert Services.

**SOA Suite Installation**

This component typically includes:

- Installation and configuration of the Oracle SOA Suite, depending on customer needs
- High-level presentation around Service-Oriented Architecture and how it can be achieved using the Oracle SOA Suite
- A technical presentation focusing on features and usage of the most essential Oracle SOA Suite products – Oracle BPEL Process Manager, Oracle Service Bus and Oracle Business Activity Monitoring
- A pre-built demo depicting an end-to-end integration scenario highlighting the key functionality of the products involved
- Sharing design, development, administration, best practices guides and documentation

**SOA Suite Installation with Use Case Realization**

Includes all the above and:

- Analysis of a tangible, well defined customer-specific integration scenario
- High-level solution design and implementation approach of the customer-specific integration scenario
- Rapid prototyping of the customer-specific integration scenario

**How We Are Different**

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.
