For more reasons to choose Oracle Big Data Appliance, visit the Oracle Big Data Appliance page and download our white paper: The Surprising Economics of Engineered Systems for Big Data.

Cut costs, drive innovation, and simplify business practices. Oracle Big Data Appliance gives you an end-to-end stack for big data, analytics, and cloud applications.

1. Out of the box simplicity versus build-your-own complexity.

Oracle Big Data Appliance, Oracle Exadata, and Oracle Engineered Systems simplify big data and analytics projects. With Oracle Big Data Appliance, you get out-of-the-box simplicity, while Oracle Exadata and Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Big Data Appliance gives you an end-to-end stack for big data, analytics, and cloud applications. With Oracle Big Data Appliance, you get out-of-the-box simplicity, while Oracle Exadata and Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Big Data Appliance, Oracle Exadata, and Oracle Engineered Systems simplify big data and analytics projects. With Oracle Big Data Appliance, you get out-of-the-box simplicity, while Oracle Exadata and Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

2. Make data your detective: prevent fraud and secure your data.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

3. An open, accessible platform that empowers business analysts.

Oracle Big Data Appliance, Oracle Exadata, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

4. Cut costs, drive innovation.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

5. Cloud-like agility and simplicity.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.

Oracle Exadata, Oracle Big Data Appliance, and Oracle Engineered Systems provide a comprehensive approach to security and fraud detection. Oracle Exadata and Oracle Big Data Appliance offer end-to-end data security, while Oracle Engineered Systems provide a complete solution that is pre-integrated with Oracle technologies.
