5 Reasons Why Oracle Storage is the Development Choice for Oracle Database

Oracle Storage is the only storage co-engineered with Oracle Database to meet its demanding performance, efficiency, security, and management requirements. And, its high-performance unified storage architecture efficiently supports the development and deployment of new applications that is ready for the cloud whenever you are.

Quite simply, it’s the best choice when you are developing applications using Oracle Database.

Oracle Database is the core of your business, and your applications and development teams depend on its performance to beat development deadlines.

Up to 4X faster application processing

No wait for database copy creation

Up to 4X faster application processing

No wait for database copy creation

5 Reasons Why Oracle Storage is the Development Choice for Oracle Database

Oracle Database continues to grow rapidly, and the need for more database copies to support development and testing strains storage infrastructure and can slow innovation.

10X faster database provisioning for development and testing

65% fewer management steps than competitive solutions

ZERO translation needed between DBAs and storage administrators

Cloud Integration

Cloud changes everything, so it’s important that your IT infrastructure enable you to integrate on-premises storage with the cloud and rapidly adjust to changing business needs.

Cloud Proven with over 1 EXABYTE in Oracle IT clouds

Cloud data and application mobility

Cloud Storage with over 1 EXABYTE in Oracle IT clouds

Better Value

When evaluating storage solutions, it’s important to ask yourself “Which one accelerates application development, allows them to run faster, and simplifies my journey to the cloud?”

Oracle Storage is uniquely able to meet these requirements because it is co-engineered with Oracle Database & Oracle Cloud.

It allows you to develop applications more quickly and run them faster, it offers a built-in path to the cloud, and it simplifies your journey to the cloud.
