Integrate and Manage Your Business Processes More Cost Effectively

JD Edwards EnterpriseOne
Being flexible means having choices. After all, your business has to adapt to what your customers want. You have to keep ahead of emerging technology trends and changing business models. And so does the infrastructure that supports your operations. That’s why Oracle offers more than one approach to enterprise software.

Some software companies suffer from tunnel vision. They see the world one way, and they impose that view on their customers with a “one size fits all” approach to technology. But abstractions such as revenue and company size don’t accurately describe how you do business, and they don’t provide insight into what you demand from your enterprise solutions. Instead, Oracle’s developers examine the priorities that guide customers’ software investment decisions, learn how customers deploy the software, and study how those applications are used once they are in place. Read on to learn what customers are saying about how Oracle’s JD Edwards EnterpriseOne fits the way they do business.

JD Edwards EnterpriseOne: The Right Solution for the Right Reasons

When Investing in Software

JD Edwards EnterpriseOne customers look at software as an investment—not a one-time cost. They expect the software they purchase today to pay dividends down the road. JD Edwards EnterpriseOne provides them with a flexible, integrated architecture that lowers the ongoing cost of ownership.

Over time, JD Edwards EnterpriseOne software requires fewer of your resources and less of your attention. It’s modular, so you can implement only those solutions you need. And it offers industry-specific functionality, so you don’t have to develop custom solutions or invest in a host of third-party products to fit your needs.

When Deploying Software

Companies with finite IT resources and competing business priorities seek a solution they can implement quickly and adapt to their distinct processes without significant customization. That is, they look for a solution that allows them to do more with less.

JD Edwards EnterpriseOne helps you realize value from your solution sooner than other solutions by providing a uniform infrastructure and pre-integrated applications, middleware, and database. Simply put, it requires less effort to implement and maintain.

When Using Software

In the typical JD Edwards EnterpriseOne company, employees wear different hats. They have multiple responsibilities that require visibility into an entire business process. The same person who quotes a price may take an order, check credit, update forecasts, and approve invoices.

JD Edwards EnterpriseOne allows your employees to view information from throughout the business at any level of detail. A single, integrated database that serves your entire business ensures that you have the latest information on orders, inventories, projects, equipment, and employees so that you can make the right decisions.
JD Edwards EnterpriseOne: Designed for the Demand-Driven Environment

Demanding customers and volatile markets are changing the way you do business. To keep pace, you need to become more responsive—even as you cut costs and trim operating budgets. Meanwhile, the inherent unpredictability of your market means that you have less time to marshal the needed resources and to execute plans.

In this demand-driven world, you need technology that can help you anticipate demand and defuse problems before they happen. You want industry-specific capabilities that fit the way you do business. And you require a single, integrated source of information that makes you—and the businesses you work with—more efficient, flexible, and productive.

JD Edwards EnterpriseOne is designed for the rigors of the demand-driven environment. It optimizes effort within your business and extends those efficiencies out to your supply chain. You have greater access to real-time information stretching from your customers to your suppliers, so you can synchronize the effort of your employees and your supply chain partners. And you have better control of business processes as they move from department to department.

Thousands of businesses all over the world have found that JD Edwards EnterpriseOne helps them translate the challenges of the demand-driven world into competitive advantage. Here are some of the reasons they rely on JD Edwards EnterpriseOne to support the way they do business.

Because Different Industries Face Different Challenges

Every industry has unique processes and its own take on best practices. Companies want functionality tailored to the nuances of the way they do business. JD Edwards EnterpriseOne offers the specific functionality you need to meet the challenges unique to your market. You don't have to fit a square-peg solution into the round hole of your industry requirements.

Because Different Businesses Face Similar Challenges

Regardless of your industry, you face many of the same challenges that other businesses face. You have limited resources but unlimited possibilities. You don't have an army of IT people. You want a single, integrated, real-time view of information across all facets of your business. You want to rein in costs but keep your options open. Ultimately, you want to be more connected, responsive, and adaptable. JD Edwards EnterpriseOne is designed for companies such as yours.

Because Innovative Companies Need Innovative Solutions

In the typical JD Edwards EnterpriseOne business, decisions get made by the people on the shop floor, at the job site, in the warehouse, and on the phone with customers. Empowered people need quick access to a wide range of information. They need the big picture, and they need to delve into the details, depending on the task at hand.

JD Edwards EnterpriseOne helps your people be more proactive—an important trait for demand-driven enterprises. It gives the innovative people in your business the tools they need to be more efficient and effective instead of dictating how they do their jobs. It increases your visibility into information, from a consolidated enterprise view down to source transactions and journal entries.
Because Productivity, Efficiency, and Accountability Don’t Go Out of Style

Good business solutions should be good at the fundamentals. So JD Edwards EnterpriseOne helps you manage core processes involving finances, people, and equipment to make the best use of information and resources throughout your business. After all, smart business is good business.

Because Your Business Processes Know No Boundaries

When you receive an order, things happen in your business. Forecasts change, inventories change, and manufacturing plans and distribution schedules change. Purchase orders, contracts, sales orders, and invoices move from department to department, business to business.

JD Edwards EnterpriseOne gives you a single, integrated source of management information and capabilities, so you can track processes in real time as they flow through your business and partner network. It puts every department in your business on the same page, so you can turn good strategies into workable realities within your business and throughout your supply chain.

Because Divisions and Subsidiaries Think and Act Like Independent Businesses

Who says big businesses can’t be responsive, flexible, and efficient—especially their divisions and subsidiaries? The fact is, subsidiaries can have all the same needs as an independent business. JD Edwards EnterpriseOne fits well into these “businesses within businesses,” offering them the specialized functionality they need with the flexibility to comply with the parent company’s reporting and accountability requirements.

JD Edwards EnterpriseOne: Designed for Your Industry

No business is an island. Each competes in a specific industry context. Not surprisingly, businesses with similar priorities look for similar capabilities from an enterprise solution. That’s why JD Edwards EnterpriseOne has such a strong following in specific industry contexts. It fits well in industries with tightly integrated operations, where success comes from acting quickly on shared priorities, sharing information across departments and partner networks, and anticipating market changes and customer demand. Simply put, JD Edwards EnterpriseOne fits well in businesses that would rather be experts in their industries rather than experts in their technology.

For Manufacturing and Distribution Businesses

In the demand-driven market-place, JD Edwards EnterpriseOne paves the way for more efficient “pull” and make-to-order methods—where customer demand instantly resonates throughout the supply network and triggers coordinated action between you and your partners. You can streamline your time to market, minimize inventory levels, and improve communications and shared processes in your supply chain.

» Industrial Manufacturing
» Chemical
» Life Sciences
» Wholesale Distribution
“JD Edwards EnterpriseOne applications enable us to manage our business in an integrated and structured manner across lines of business, including firearms, spare parts, and clothing. We can now meet the needs of national and international clients more quickly while optimizing management costs.”

BARBARA TOCCHELLA
INFORMATION AND COMMUNICATION TECHNOLOGY SYSTEM ENGINEER
FABBRICA D’ARMI PIETRO BERETTA S.P.A.

For Consumer Goods Businesses

Businesses in the consumer goods industry face unprecedented pressure to provide greater variety and quality within their product lines, while simplifying complex supply chains and competing with price pressures imposed by retail consolidation. JD Edwards EnterpriseOne for consumer goods provides a complete solution tailored to help overcome critical business challenges by improving efficiency, simplifying compliance requirements, and driving innovation for ongoing expansion and profitability growth.

» Food and Beverage
» Fashion and Apparel
» Cosmetics
» Durable Goods
» Agribusiness

For Asset-Intensive Businesses

In businesses that have extensive investments in high-cost assets, JD Edwards EnterpriseOne helps you balance the competing priorities of optimizing asset utilization, reducing cost of goods sold, and improving customer service.

» Paper and Packaging
» Oil and Gas
» Mining and Aggregates

For Project and Services-Oriented Businesses

JD Edwards EnterpriseOne gives you the tools to manage material, time, talent, and expertise to keep projects in scope, on time, and on budget. You can strengthen your market profile, increase project profitability, and boost resource productivity while reducing your exposure with clients and subcontractors.

JD Edwards EnterpriseOne: Designed to Offer Immediate and Long-Term Value

JD Edwards EnterpriseOne offers the best match of products and services to help you reach your short- and long-term objectives.

You can select the technology you need as you need it to address your most important business challenges. If you want to improve your capital asset use, you can start there. If you want to improve supply chain responsiveness, you can start there. If you want to streamline project management, you can start there. You can build a solution one step at a time and take the steps in virtually any order that you want as your business grows and changes.

Because You Need Choice in Operational Delivery

JD Edwards runs in the Cloud today and is available via Oracle’s Managed Cloud, Partner Private Clouds, and Partner SaaS offerings. Customers are embracing hybrid cloud where Oracle SaaS applications are implemented alongside JD Edwards on-premise applications to complement JD Edwards’s deep ERP and industry solutions.
“With Oracle’s JD Edwards EnterpriseOne, we created a very stable enterprise-application environment that provides consistent information to our global engineering and construction operations for more accurate business analysis and decision-making.”

CULLIN WIBLE
CIO
THE CONTI GROUP

JD Edwards is actively evaluating each Cloud layer (SaaS, PaaS and IaaS) to determine where JD Edwards customers can gain the most value and which are technically and practically feasible for JD Edwards customers to embrace.

Because You Only Need What You Need—When You Need It

JD Edwards EnterpriseOne is modular. You purchase and implement only those applications that make sense for your business today. As your needs change, you can implement new applications. It makes better sense for your IT team, because they install and maintain only those applications that your business uses. It makes better sense for your employees, because they learn only those applications that they actually use. And it makes sense for your bottom line, because you purchase only what you need, when you need it.

Because Your Market Is Changing

Unpredictability is now the norm, so JD Edwards EnterpriseOne helps you manage market volatility by making you more responsive. It adapts to the way you do business today and can adapt to the way you want to do business tomorrow. It helps you transition from inefficient and costly “push” business methods (such as make-to-stock) to leaner, more profitable “pull” methods (such as make-to-order)—even if you’re in a service industry or asset-intensive business. By sharing information through self-service applications, you can efficiently coordinate efforts with partners and be more proactive with customers.

Because the World Gets Smaller But Your Business Keeps Growing

Every day, your customers and your competition become more global. JD Edwards EnterpriseOne gives you the multicurrency, multi-language capabilities to do business where your customers do business. You can set your sights on new markets, anywhere in the world. And as your business grows, JD Edwards EnterpriseOne has the multisite capabilities and scalability to help you manage that growth.

Because Technology Is Standardizing

Proprietary technologies can lock you out of sharing information with your customers and partners. That’s because incompatible systems can’t easily talk to one another, which keeps businesses from talking to one another. JD Edwards EnterpriseOne keeps you open to emerging and established technology standards, so you can be open to new opportunities. You can add new technologies, interface with partner and customer systems, and maintain the discipline, security, and data integrity you need.

Because a Connected JD Edwards Simplifies, Standardizes, and Optimizes

Collecting information from machines enables organizations to integrate this information into their business processes to make more intelligent decisions, reduce costs, and create new revenue streams. The JD Edwards EnterpriseOne Internet of Things (IoT) Orchestrator enables customers to collect, filter, analyze, and act on real-time data as it is being transmitted by IoT devices. JD Edwards EnterpriseOne customers benefit by eliminating costly manual processes, by reacting to or avoiding business disruptions in real-time, and by analyzing historical data for continuous process improvement.
“Thanks to the robust and flexible enterprise resource planning platform of Oracle’s JD Edwards EnterpriseOne, we’ve gained end-to-end, real-time visibility into the entire supply-chain cycle, enabling us to respond faster to market demands. We now report monthly financials 3x faster and calculate inventory 63x faster. We’ve also enhanced pricing control across 3,000 dealers and have optimized production planning.”
