

ORACLE DISCOVERER METADATA CONVERSION ASSISTANT HIGHLIGHTS

PRODUCT FACTS & FEATURES

KEY FEATURES

- Accelerate metadata conversion from Discoverer to Oracle BI Enterprise Edition
- Support for Oracle BI Enterprise Edition 11g
- Supports conversion from Discoverer 10.1.2.x and up
- Conversion services available from Oracle Consulting and partners

Oracle's Lifetime support policy provides continued, uninterrupted support and enhancements to existing Discoverer customers. Discoverer customers who choose to migrate to Oracle BI Enterprise Edition will be able to take advantage of a comprehensive business intelligence solution for reporting, ad hoc query and analysis, OLAP, dashboards and scorecards. Oracle BI Enterprise Edition features an architecturally integrated technology foundation that provides a Common Enterprise Information Model based access to multiple data sources over the web. Oracle Discoverer Metadata Conversion Assistant is a utility designed to accelerate the metadata conversion from Discoverer to Oracle BI Enterprise Edition. Services from Oracle Consulting and partners can also be leveraged to speed up the conversion process.

Oracle Discoverer Metadata Conversion Assistant

Oracle Discoverer Metadata Conversion Assistant is a command line utility that accelerates the migration of Discoverer metadata from the End User Layer (EUL) to Oracle BI Enterprise Edition. The command line utility takes a Discoverer EEX export file and generates an RPD file that can be used in Oracle BI Enterprise Edition. Note that this RPD file is compatible with Oracle BI Enterprise Edition 10g, but Oracle BI Upgrade Assistant can be used to upgrade this RPD file for use with Oracle BI Enterprise Edition 11g.

The scope of the Conversion Assistant is limited to converting the Discoverer End User Layer (EUL) to RPD file only. Other Discoverer objects like Workbooks, Business Areas, Folders and Items, Joins and Hierarchies have to be manually converted to their Oracle BI Enterprise Edition equivalents.
