

Efficiency

- Online – eliminates manual steps and paper
- Integration with ERP systems
- Dollar and time savings

Automation

- Workflows and notifications
- Automated document collection
- Compliance tracking

Collaboration

- Single database for all project users
- Anytime, anywhere online access
- Real-time information

Risk Reduction

- Better visibility into activities
- Enhanced variation, visibility, and management
- Payment holds tied to compliance

Oracle Textura Payment Management is a web-based solution that automates and streamlines construction payment management processes – enabling online collaboration on core payment process areas: claim submission, compliance management, statutory declaration collection and tracking, and disbursement.

Oracle Textura Payment Management boosts efficiency by eliminating manual, paper-based processes and mitigates risk through improved visibility into project activities. And, our team provides unlimited training and support for builders and subcontractors.
