Oracle Consulting Lift and Shift for Oracle Java Cloud Service

Is your organization struggling to adopt Oracle Java Cloud Service to enable delivery of Java applications at the pace demanded by your business stakeholders, customers, and competition? Oracle Java Cloud Service provides the complete platform and infrastructure for building, deploying and managing your Java EE applications and Oracle Consulting provides the experience and leading practices to assist your development team in pivoting to the Oracle Cloud. The Oracle Consulting Lift and Shift for Oracle Java Cloud Service prepares your development teams to take full advantage of the Oracle Java Cloud Service including rapid environment provisioning and seamless migration of your organization’s Oracle Java EE applications from on-premise to the public cloud.

Key Features

- Migrated and verified Oracle Java EE Applications to the Oracle Java Cloud Service environment
- Provide a methodology and process for provisioning and deploying to the Java Cloud Service that is based on Oracle leading practices
- Prepare your IT team to leverage the Oracle Java Cloud Service for building, deploying and managing Java EE applications

Key Benefits

- Demonstrate the value and benefits of subscription based cloud services accelerating adoption
- Establish Oracle Java Cloud Service development, deployment and management processes with expert guidance and leading practices
- Accelerate organizations transition to Oracle Cloud Services and the realization of associated benefits

Build Better Applications Faster, Smarter, and more Efficiently

Oracle Consulting can help you realize the value of cloud computing faster and with less risk by leveraging our extensive experience, Oracle leading practices, and proven delivery approach. Oracle Consulting will lead the engagement working with your IT team to provision, migrate, and validate your organization’s Oracle Java EE applications from any third party cloud provider or on-premise to the Oracle Java Cloud Service environment. The engagement will include selection of on-premise Oracle Java EE applications for migration, defining a target configuration to support the application, provisioning of the Oracle Java Cloud Service environment, migration, and validation of the selected application to the Oracle Java Cloud Service. Oracle Consulting will also assist with establishing connectivity from your Oracle Java Cloud Service environment to your pre-existing Oracle Database instances on the Oracle Database Cloud Service environment required to support the migrated application. The engagement is concluded by reviewing the operational and management features of the Oracle Java Cloud Service with your IT team. This engagement will provide your team with the knowledge, processes, and skills to enable future application deployment to the Oracle Java Cloud Service.

Key Deliverable:

- Workshop to provide an overview of Oracle Java Cloud Service capabilities, benefits and leading practices when provisioning and
