

Empowering Businesses to Deliver at Market Speed

DIGITAL TRANSFORMATION REQUIRES CONSUMERIZATION OF DEVELOPMENT

The onslaught of mobile devices and consumerization has brought about a digital transformation that has created new ways of doing business. This includes a heightened expectation of responsiveness from the business increasing the load on IT.

Multichannel

6 billion

Mobile Subscribers¹

Data and Event Explosion

90%

Created within the last two years²

Consumerization

BYOD market US **\$89.6B** in 2019³

Putting the customer first—demands responsiveness.

WHAT'S THE CHALLENGE/TREND

Ad Hoc Apps

Today, IT is heavily optimized to develop and manage long-running, durable applications. But current demand calls for the creation of adhoc apps and fast frequency changes to apps

By 2018 digital business will require **50% fewer business process workers and 500% more key digital business jobs**, compared to the traditional model⁴

Eliminate IT Dependency

Organizations struggle from the inability to stand up business process solutions quickly due to IT backlog.

By 2017, **70%** of successful digital business models will rely on deliberately fluid processes designed to shift as customers' needs shift.⁵

Cloud Is the Way

Revamping existing legacy infrastructures to cater to new digital requirements is expensive.

37% of businesses are using cloud solutions to improve alignment with customers and partners.⁶

Empowering Business Users

Business users rely on IT and cannot deliver on business applications independently—a necessity to shorten the time between ideas and execution.

By 2017, **75%** of IT organizations will be confronted with the impact of consumerization of development.⁷

THE SOLUTION: RAPID PROCESS AUTOMATION IN THE CLOUD PROVIDING...

Design and Development

Empower business users to design and develop business applications with zero coding and seamless integration of back-end applications.

End-to-End Visibility

Allows line-of-business owner to get visibility and to optimize and manage business applications.

Cloud Solution

A cloud solution eliminates IT setup, infrastructure costs, and lowers total cost of ownership.

ORACLE PROCESS CLOUD SERVICE = RAPID PROCESS AUTOMATION

FEATURES

- ▶ Subscription-based business process management cloud service
- ▶ Business-driven rapid process design and automation
- ▶ Easy integration with on-premise or other Oracle or external cloud service offerings
- ▶ Multichannel, responsive interfaces across web, phone and tablet

BENEFITS

- ▶ Empower business users with self-service and process control tools
- ▶ Increase business visibility, agility and control
- ▶ Enable mobile workforce productivity
- ▶ Leverage rich connectivity to a variety of back-end applications
