

# More SAP ERP customers face the same barriers to efficiency

Gatepoint Research conducted a 2022 survey of current SAP Financial Management customers who hold executive and management roles in finance, financial planning, and accounting. The survey data highlights the recurring challenges SAP users face in critical business areas. The findings are not surprising as these organizations are constrained by legacy SAP ERP systems that were built for yesterday's business challenges.

## Top obstacles selected by SAP ERP customers increased over the 2021 survey...

### Disconnected finance systems:

### Lack of collaboration across departments:

The question was "What are the three biggest obstacles to optimizing your financial management process?"

When left ignored, disconnected systems and inadequate cross-department collaboration can dramatically amplify global economic impacts.

## The top three global economic impacts selected by SAP customers increased over the 2021 survey...

### Rising business costs

+33%

### Supply chain disruptions

+25%

### Workforce disruptions

+10%

The question was "How has your business been impacted over the last year?"

The year-over-year trend is going in the wrong direction.

## Oracle Fusion Cloud Enterprise Resource Planning (ERP) can help SAP ERP customers unify their disparate financial processes and improve cross-department collaboration with:

### Connected cloud applications

**How:** Oracle offers a complete suite of flexible modular cloud applications that are engineered to work together and are composable as they are optimized for adaptability with fast innovation cycles.

**Why this matters:** When all modules are built on unified data, you can optimize processes and analyze data across departments using a single cloud. This makes collaboration easy.

### Embedded artificial intelligence

**How:** Built-in artificial intelligence (AI) automates the most time-consuming, mundane business processes and delivers predictive planning and forecasting for faster adaptability to new situations and better cost management.

**Why this matters:** With AI, up to 96% of transactions can be automated, giving your employees more time for strategic work.

### Continuous business process optimization

**How:** Every 90 days we deliver the industry's most advanced technologies to your applications so that you can modernize processes, automate manual work, increase speed, and spark innovation in a highly secure environment.

**Why this matters:** You automatically receive continuous innovation and process improvements based on the latest technologies with no business disruption.

## With Oracle's unified and intelligence-driven Cloud ERP platform that connects finance departments with common data, SAP ERP customers can resolve their...

## 3 top business challenges

### 01

#### Decrease business costs

##### Did you know that around 90% of all on-premises SAP customers have customizations?

These customizations were not created with AI, ML, blockchain, or IoT in mind and have potentially astronomical reimplementations costs. It's time to think about a more cost-efficient way:

- Control your total cost of ownership with Oracle Cloud ERP and access quarterly innovation updates
- Immediately reduce costs by running your applications on Oracle Cloud Infrastructure (OCI)

### 02

#### Reduce supply chain disruptions

##### Proactive planning and modeling

Scenario planning prepares organizations for disruption and unforeseen events, helping you to anticipate and respond to market conditions and disruptions with what-if analysis.

##### Cross-function planning and forecasting

Connected enterprise planning helps drive budgeting and forecasting across lines of businesses and gives you a holistic view of your supply chain and workforce challenges.

### 03

#### Minimize workforce disruptions

##### Complete enterprise planning

Create a connected plan across your organization to address short- and long-term talent needs by joining workforce planning, integrated business planning and execution (IBPX), and financial planning.

##### Unified ERP and HCM data

With one source of truth for finance and HR data, you can use ML-driven analytics to gain a deeper understanding of workforce issues and how they correlate to profitability to better predict business outcomes
