Oracle Self Service Procurement Cloud

An integral part of Oracle’s Procurement Cloud suite, Oracle Self Service Procurement Cloud provides a user-friendly approach to managing employee requests for goods and services. Self Service Procurement Cloud provides the best capabilities of consumer shopping web sites with the tools to control spend. This increases the level of satisfaction for your employees, reduces your support costs and ensures more of your spend is at the best price possible with the lowest impact on your procurement team.

Accelerate Self Service Adoption

Oracle Self Service Procurement Cloud delivers a friendly user experience that is similar to the best consumer web sites. With little or no training, employees can easily search, use shopping lists, browse categories, and find what they need quickly. This means that for most use cases, there’s little for employees to learn and fewer barriers to success. You can also leverage advanced capabilities for instances where there are requirements such as one-time delivery, accounting splits and project accounting. Self Service Procurement Cloud’s user experience changes the dynamics of user acceptance. Ultimately this has a major impact on user satisfaction, which drives broader adoption, compliance, and savings.

Enforce Negotiated Terms and Policy Compliance

Oracle Self Service Procurement Cloud helps you enforce compliance with negotiated terms and approval policies. Catalog management tools help improve compliance with supplier agreements by directing users to preferred suppliers and negotiated prices. Flexible rules can be used to automate financial accounting using attributes such as amount, commodity and cost center. Approval workflow rules help enforce controls, close compliance gaps, and simplify exception management. Simplified approval notifications provide a quick, clear view to the most important information on all platforms including smart phones and tablets. With Oracle Self Service Procurement Cloud, the savings you negotiate with suppliers are automatically enforced.

Oracle Procurement Cloud Applications

Oracle Procurement Cloud helps organizations streamline, standardize and automate their source-to-settle process through modern technologies that help increases influence over spend and procurement practices. It increases user engagement, increases collaboration and simplifies, standardizes and automates routine transactions resulting in lower costs and higher margins.
