Transformation

Arming you with the mindset, methodology, tools, and resources to successfully journey to the cloud and beyond.
Our transformation mission

Moving to the cloud is more than a software upgrade. It’s an organization-wide shift in mindset, culture, and ways of working.

It is an experience.

We are transformation agents who constantly inspire others to see and realize possibility.
Cloud culture

When we understand our clients’ goals and unmet needs, we can serve a project tailored to their unique culture and readiness.

Our cloud culture assessment and corresponding workshop help address any cultural gaps during mobilization, and the sentiment tracker measures progress and satisfaction over time.
Change Navigation

Oracle’s Change Navigation practice equips our customers with the mindset, methodology, tools, and resources to own and drive their change journey confidently.
Process-led implementations

We believe that every implementation is a transformation. And transformation success depends on how confident people feel about the changes to their ways of working in the cloud. Successful transformations happen when people feel confident about what’s changing. Our process-led implementations help clients understand how work will be different after Go Live.

It’s another way we demonstrate expertise well beyond the technical prowess for which we are known.
Branding engaging experiences

The journey to the cloud is complex and demanding for everyone involved. But what if we could make it feel more rewarding and inspired?

We create inclusive experiences that deliver a more engaging journey to the cloud so our clients can thrive in their new environment.
