Transformation Services

Arming you with the mindset, methodology, tools, and resources to successfully journey to the cloud and beyond.
Our transformation mission

Moving to the cloud is more than a software upgrade. It requires an organization-wide shift in mindset, culture, and ways of working. It’s a commitment to transform from within.

As agents of transformation, we will empower you to drive your transformation through the software implementation so you can adopt and sustain future ways of working as smoothly as possible, achieving faster time to value.
Cloud Culture

Moving to the cloud requires a unified shift in team culture. The team dynamic is critical to a successful journey to the cloud—and thriving within it.

Our Cloud Culture Assessment, and corresponding Cloud Culture Workshop, helps address any cultural gaps during mobilization, and the sentiment tracker measures progress over time.
Future state of work narrative

We’ll collaborate with you to create strategic communications that articulate your vision, objectives, and the benefits of your transformation. This narrative will help drive consistency and transparency as your leaders discuss the importance of this transformation in your business.
Change management

Oracle’s change management practice equips you with the mindset, methodology, tools, and resources to own and drive your change journey confidently.
How we assemble your dream team

When it comes to transformation, we feel you. Many of us have been in your shoes as clients and have previous experience in your industry. You can count on us to dive deep into unexpected situations and emerge victorious—because we’re stronger together.
