Oracle Content Management

Manage and develop websites, portals, and experiences with an agile content management system

ORACLE

Content management solutions for every line of business

Oracle Content Management is a complete content management solution (CMS) that helps marketers, developers, and business leaders manage, create, and activate practically any type of content in one cloud native system, including websites, documents, videos, graphic assets, and more. Everyone in your organization can use this complete content management system —built on an API-friendly foundation—to keep up with your growing business needs and complexities.

The solution's extensibility and flexibility combined with scale and security redefines the content management category so that your content is consistent, collaborative, and most importantly, available to customers, employees, and digital experiences.

As we got into the platform, we were learning about so many things we'd be able to do and spin up what we needed quickly. What's next for us? The sky's the limit.
—Patrick Tolbert, Global Marketing Manager, Airborn

Delivering on your content needs:

Use this centralized solution to create, manage, and distribute any content or asset type

Make the right content available when and where customers engage with you

Work efficiently across teams and accelerate speed to market with built in workflows

Publish your content across CRM and back-office systems seamlessly with omnichannel delivery

Easily create and stream videos that get and keep your customers' and employees' attention

Oracle Content Management

Oracle provides a hybrid content management solution that meets you wherever you are in your digital journey and grows with the needs of your business.
