The Safe Drinking Water and Toxic Enforcement Act, as known as Proposition 65, is a California law that has been in effect since 1986. The goal of Proposition 65 is to protect Californian residents and the environment from excessive exposure to hazardous substances including carcinogens and reproductive toxins.

To comply with Proposition 65, businesses are required to provide clear and reasonable warnings to individuals in the state of California before knowingly and intentionally exposing them to listed chemicals known to the state to cause cancer, birth defects or other reproductive harm. Warning is not required if the anticipated exposure level will not pose a significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.

Products supplied by Oracle contain chemicals such as Lead and Lead Compounds that are identified by the state of California to cause cancer, birth defects or other reproductive harm. Oracle's products are intended for use in occupational settings, and are not for consumer sale or use. Therefore, exposure to the hazardous chemicals in Oracle's products is considered "occupational exposure".

Due to the presence of Proposition 65 listed chemicals in Oracle's products, for customers who purchase Oracle's products for use in occupational settings in the state of California, refer to www.P65Warnings.ca.gov for more information on the warning requirements.
