Oracle's Statement on Per- and PolyFluoroAlkyl Substances (PFAS)

May 2026, Version 1.0
Copyright © 2026, Oracle and/or its affiliates

Per- and PolyFluoroAlkyl Substances (PFAS), also known as “forever chemicals,” are synthetic chemicals widely used for their unique performance properties primarily to make products that are oil, water, chemical or heat resistant.

The environmental implications of the use of PFAS are potentially significant, as they break down very slowly and are thought to persist in the environment. As such, PFAS may be linked to harmful health effects in humans and animals.

PFAS are addressed by global regulations such as REACH, EU POPs, US EPA TSCA, together with related regulations. Oracle supports the objective of regulators to protect human health and the environment from exposure to chemical substances that have been identified as PFAS. Oracle's compliance efforts focus on meeting legal requirements by the dates identified in applicable legislation.

Oracle continues to monitor updates to the PFAS regulations and work with our suppliers to identify the presence of any PFAS in our products.

If you have any specific questions or concerns about Oracle's PFAS status, please communicate them to your Oracle account executive.

NOTICE:

Oracle is committed to minimizing the use of potentially harmful substances in developing, manufacturing and packaging of Oracle products. Oracle endeavors to comply with all applicable laws and regulations restricting the use of potentially harmful substances in the development, manufacturing and packaging of Oracle products, and governing the use, sourcing, recycling and reporting requirements for raw materials. Oracle requires the removal of potentially harmful substances from its products, and maintains records regarding the raw material content of Oracle products, to the extent required by applicable laws or regulations.
