Essential Strategies for Contact Center Management
31% of customers say the most frustrating aspect of a poor customer service experience is having to provide information multiple times.²

Contact center management

Without effective call center management, you’re more likely to experience:

- **Frustrated customers** who have difficulty getting help, need to repeat their information to different agents, and receive incorrect information
- **Elevated costs** due to new hiring and training
- **High agent turnover** due to outdated and disconnected systems, unrealistic satisfaction scores, and inconsistent institutional knowledge
- **Disparate data and systems** that provide different customer views and hinder internal collaboration
Build your foundation

Developing strategies to improve your contact center can seem like a daunting task. But if you focus on these five areas, you’ll be on your way to providing better customer experiences.

1. Customer preferences
Do your customers prefer to engage digitally or on the phone? Are they comfortable with text messaging or video? Can they easily access these different channels and devices? Questions like these will help you better understand your customers and think about what changes you may need to make.

If you sell to businesses that must comply with data privacy regulations, your contact center will also need to be built around these requirements.

2. Business goals (short-term and long-term)
Every service organization has different goals. For some, they’ve been asked to turn customer service into a revenue generator by selling additional products. Others need to improve operational efficiency so that fewer agents are needed. Or maybe there’s a focus on automating more aspects of customer service to reduce staffing costs and fund innovation. As you set out to develop your plan, consider your initiatives and whether they are likely to stay the same or change over time.

3. Company’s growth strategy
If you plan to expand globally, your contact center employees and systems might need changes. For example, you may need to hire agents who speak specific languages or change processes to comply with regional data capture and privacy laws. If you’re launching new products and services, your agents will need training on them. And if mergers or acquisitions are on the horizon, it’s essential to think through the technological, operational, and human resources challenges of combining contact center operations.

4. Hiring and talent management
Your agents are the public face of your company, but good help is hard to find—and expensive. Every time you lose an agent, it costs your contact center $35,000 to $105,000.³ What is your company’s hiring and talent management philosophy? Is a remote workforce effective, or do you need a physical location for contact center employees? Whether your employees are remote, onsite, or a combination of the two, consider how you can improve onboarding, training, and management of your employees.

5. Innovation
There are many opportunities to optimize contact center operations through automation—from simple service requests to complex workflows. Consider how you might use innovation to improve your customer and agent experience. Will those innovations work with your IT roadmap and is there support for investment and experimentation with emerging technologies? Your agents will need to be prepared to adopt these kinds of changes and receive any necessary training.
Five steps to get started with contact center management

01 **Determine points of friction**

Work with your agents and escalation department to discover the top points of customer and agent frustration. Are your agents spending valuable time on repetitive tasks that could be automated? Are customers offered self-help content that doesn’t solve their issues? Analyze both your agent and customer journey to identify opportunities for automation, streamlining, and improvements.

02 **Identify the channels your customers prefer**

Contact center success is all about customer satisfaction. How do your customers prefer to engage? Look at metrics to see which channels are used most and review customer feedback to discover the biggest areas of friction and frustration. Once you grasp your customers’ preferences, do you have a plan in place to engage on those channels? For example, if most of your customers prefer mobile chat, do you offer that option? Find out if your customers are using new channels you may want to add. Consider meeting with IT, service leaders, and top-performing agents to identify technology gaps, potential solutions, and ways to measure success.

03 **Evaluate and invest in your technology stack**

Find out if your service team has the applications and communications tools they need. Once you identify the gaps, include some of your top-performing agents in the process of evaluating and selecting new apps. The more involved they are in the process, the more they’ll feel valued and invested in the success of the team.

And keep in mind that new agents joining right out of school will expect to use the latest apps. In fact, 16% of Gen Z and Millennial employees have quit because their employer failed to provide the proper technology for them to do their job.⁴

05 Set measurable goals for now and the future

Determine short- and long-term goals that address your current contact center challenges, as well as service technology trends that will emerge over the next five years. These can include:

- Improving customer satisfaction (CSAT) scores
- Speeding resolution times
- Improving first call resolution rates
- Reducing contact center call volume
- Decreasing number of escalations
- Shortening agent onboarding times
- Improving agent productivity
- Improving employee experiences ratings

04 Create your innovation plan

How can you take your contact center from good to great? Your IT group can help you explore the latest innovations in automation and data analytics. Implement features like screen sharing, video chat, internal collaboration tools (such as Slack), and guided assistance for recommended agent actions, etc.

But don’t limit your innovation to technology alone. A fresh approach to your people and processes can also enhance your contact center. Work with your HR team to get recommendations for agent hiring and training. Think about new ways to use your current CRM. Create bonus programs that motivate your agents with rewards that are meaningful to them.
Benefits of effective contact center management

Great contact center management is critical to both agent and customer satisfaction. It also supports the growth of your business, as well as your overall brand.

1. Help your agents get more done
Leave the days of navigating multiple screens and systems behind. A single-interface platform requires less training and helps agents resolve issues quickly, without getting overloaded by customers waiting in the queue.

2. Show your agents you value them
The average contact center has a turnover rate of 30 to 45%. Beat those odds by recognizing high perform-ance, providing career development opportuni-ties, and outlining a clear growth path. Put in place measures and training for your agents to work more flexibly—when and where that works for them.

3. Get a complete view of your customer
When your customer service system is integrated with customer-facing marketing and sales systems, as well as finan-cial and supply chain systems on the back end (including billing, order management, inventory, and shipping), your agents have the data they need to provide the most accurate service.

4. Fulfill customer expectations
Your contact center must provide the platform for an exception-al customer experience. A majority of consumers—61%—say they’ve stopped transacting with a business after a poor service experience. That’s why it’s critical your customers receive consistent, accurate, seamless service across all channels.

5. Expand your definition of customer service
Contact centers don’t have to just be cost centers. Through integration with other systems and collaboration with other business units, your agents can help upsell and cross-sell. Want to improve your products and services? Have agents ask for feedback. When customers feel heard, they feel more loyal and are more likely to recommend your company to others.

90% of customers more favorably view brands that give them the opportunity to provide feedback.²
