Give your Mother’s Day campaigns the special treatment

Mother’s Day is typically filled with pampering and presents, such as flowers, cards, or special outings such as brunch or a spa day. While the pandemic may have affected purchases the last few years, consumers are armed with a new sense of normalcy and fewer restrictions, allowing moms to be celebrated bigger than ever before.

Create an effective data-driven strategy for your Mother’s Day campaign by combining past Mother’s Day purchase trends with helpful targeting tips by Oracle

**Millennials spoil moms**

Last year, 25–34-year-old consumers planned to spend an average of $367 on moms, leaning towards higher priced gifts like jewelry or electronics. They’re also more amenable to advertising, with 48% looking to retailers for shopping inspiration. Target these consumers accurately with Oracle’s Demographic segments layered with Mother’s Day shoppers to increase ROI.

**Breakfast at Tiffany’s**

While greeting cards and flowers held the highest percentage of planned purchases, jewelry and special outings led the way in terms of money allocated, bringing in over $6 and $4 billion respectively last year. Find those who are more likely to spring for earrings over roses with Oracle’s purchase-based audiences, since the best predictor of future behavior is past behavior.

**Mama’s boys**

Men spend almost double what women spend on Mother’s Day, averaging $285 by buying gifts for their wives and mothers. To target these men with the right creative, divide your targeting tactic by age as 18–24-year-olds are more likely to buy just for mom, while 25–44-year old’s may buy for both. Oracle’s insight tools can also help you narrow your targeting by providing a deeper look into your consumers through 1st party CRM data or 3rd party purchase audiences.

**Bet on tradition**

While 44% of consumers want to find a unique gift for moms, most purchase within traditional gift categories such as cards, flowers, special outings, gift cards, clothing, electronics, or jewelry. To position your product as the “it” item of the season, utilize contextual targeting to surround relevant Mother’s Day articles like gift guides or feel-good blogs, whose ads garner over 17 seconds of interaction time, with attention quality 143% above benchmark!

Reach your customers and prospects everywhere

Consumers are more digitally connected through smartphones, laptops, gaming consoles, and TVs than ever before. They also bounce seamlessly across devices, media formats, and platforms throughout the day, while expecting a consistent customer experience. Utilize Oracle Audiences to develop a cohesive audience strategy that is portable across platforms and allows you to find your intended audience wherever they engage.

**Addressable TV**
Segment TV viewers by adding Oracle audience targeting to households through Video On Demand (VOD) or linear TV via cable, satellite, and set-top-boxes. Leverage partnerships with DirecTV, Dish, or Sling to avoid wasted media spend and increase ad relevancy for engaged TV viewers.

**Commerce Platforms**
Don’t just rely on making the shopping list. Engage relevant consumers who are actively shopping in the moment through some of the largest ecommerce platforms like Amazon and Wal-Mart.

**Connected TV (CTV)**
Explore connected TV, with a fully immersive ad experience of sight, sound, and motion. Oracle Audiences can help you deliver ads to valued customers and prospects on over 10 different endemic and programmatic CTV platforms including Hulu, Amazon Fire TV, Sling, Samsung, and Roku.

**Demand Side Platforms (DSPs)**
Expand your reach into the open internet by utilizing a Demand Side Platform (DSP) to activate the depth and breadth of data found in Oracle Audiences—available across all major DSPs including Google, MediaMath, The Trade Desk, Xandr, and more.

**Social Platforms**
Capture the attention of a highly engaged and logged-in user base across social platforms such as Facebook, Pinterest, Snapchat, and Twitter. Oracle’s audiences, particularly those built from purchase data and other offline signals, compliments native behavioral targeting signals available on these platforms.

**Streaming Audio**
Engage your target audience whether they are rocking out to their favorite music or actively learning through podcasts on platforms such as Pandora and Spotify.

*Note – audience and contextual targeting segment availability varies platform by platform.
