Oracle Database Backup Service
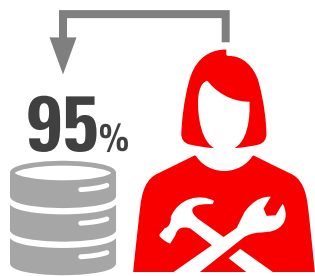

Stuff happens.
Stay protected.

DBAs are facing uphill challenges as database growth accelerates. What's more, database management and protection is becoming more and more complex, which means DBAs are working harder than ever to keep pace.
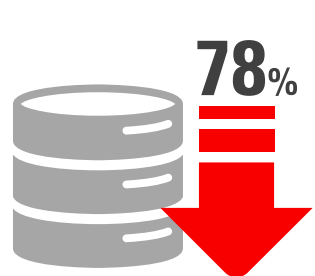

DBA STRESS BY THE NUMBERS

39%

Workloads for DBAs are increasing
39% of DBAs handle **50 or more** databases

95%

Automation is lacking
95% of DBAs create or upgrade databases manually

78%

Downtime is on the rise
78% of DBAs **will** experience unplanned downtime from untested database changes during their careers

PROTECTING DATABASES IS A MISSION-CRITICAL RESPONSIBILITY…

…which isn't always easy · **5 out of 6** businesses will, at some point, experience failed recoveries and potential data loss

DBAs and IT staff are struggling to provide full protection · **2 out of 3** organizations use multiple tools to backup a single database

Existing solutions for off-site protection are cumbersome and complex

Recovery from an off-site tape vault can take days

BUT PROTECTING ORACLE DATABASES JUST GOT EASIER WITH…

Oracle Database Backup Service

A secure, highly available, on-demand cloud-storage solution for storing Oracle Database backups.

Oracle's Database Backup Service is…

Easy to deploy

Highly cost effective

Secure, from end to end

Always on for rapid recoveries

It's easy to get started…
All you need to do is download the free client side backup module that integrates with Oracle Recovery Manager (RMAN), point the destination to the Oracle Storage Cloud and start backing up.

WHY YOU SHOULD BE USING IT…

Nobody knows how to backup up your Oracle Databases better than Oracle!

All Oracle solution
An Oracle cloud solution that protects your critical Oracle databases, without multi-vendor support complexity

Simple and cost effective
On-demand, elastic storage. No CAPEX or on-premise secondary storage to manage

End-to-end security
Backup data is encrypted at the source and securely transmitted to the cloud

High availability
3-way mirroring in the cloud, so you never lose access to your backups

Rapid restores
Recover your data anytime, anywhere, over the Internet

Disaster recovery
Send supplementary copies of backups off-site for DR purposes

Fast and painless deployment
Seamlessly integrates with existing on-premise (RMAN) environment

CONCLUSION

Trusted and Proven

Oracle Database Backup Service: An enterprise-class, cloud-engineered, data-protection solution from the people who develop and support your database – Oracle.

Oracle Database Backup Service is part of the Oracle Public Cloud, which encompasses 19 data centers, connecting 54,000 devices, conducting 33 billion transactions per day.

Now see how it can benefit your business.
