

Database Upgrade Service

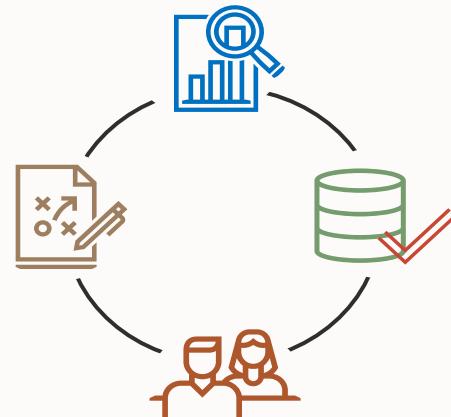

Service Description

- Oracle Database Upgrade Service is a comprehensive service from planning to production, designed to assist customers in upgrading their outdated database technology.
- The service is available for versions of Oracle Database that allow a direct path upgrade to Oracle Database 19c (11.2.0.4, 12.1.0.2, 12.2.0.1 and 18.1) and is performed “in-place”, meaning on the same hardware.

Value Proposition/Benefits

Oracle Database Upgrade Service offers customers:

- Flexibility to tailor and deploy a solution aligned with their unique upgrade plans and timing
- Peace of mind knowing your implementation is managed end-to-end
- Improved supportability, reduced risk and cost, all while preserving business continuity.

- Proven approach to upgrade planning, impact analysis, database upgrade deployment, and go-live assistance
- Ensures the environment will be functioning optimally based on Oracle reference architectures and best practices for supportability.
- Oracle Database Upgrade Service assists customers in upgrading to Oracle Database 19c quickly and with confidence.
