ACCENTURE BETA TESTING OF ORACLE AUTONOMOUS DW CLOUD

November 2018

THE ORACLE AUTONOMOUS DATA WAREHOUSE CLOUD:

COMBINING CLOUD AND MACHINE LEARNING INTO THE WORLD'S FIRST SELF- DRIVING, AUTONOMOUS DATABASE

CAN THE WORLD'S FIRST AUTONOMOUS DATABASE UNLEASH THE INTELLIGENT ENTERPRISE?

ACCENTURE TESTED THE AUTONOMOUS DATA WAREHOUSE CLOUD ON A REAL APPLICATION, RUNNING REAL-WORLD WORKLOADS

- Tests performed at multiple Accenture locations and innovation centers
- Conducted by a team of Accenture's Oracle data specialists
- Data replicated on both the Oracle Database Cloud Service and the Autonomous Data Warehouse Cloud

EXTREMELY FAST

TESTING SHOWED SIGNIFICANT SPEED IMPROVEMENT

- Inserting 500 million rows of data took less than three minutes, on average
- 1.6x performance improvement compared to published findings
- 14x performance acceleration

FEATURE COMPARISON

DATABASE PROVISIONING

MANUAL INSTALL*

4 HOURS

DBCS

1 HOUR

ADWC

SECONDS

SCALE UP / DOWN HARDWARE

PHYSICAL HARDWARE

Not possible as the hardware is not elastic

DBCS

30 MINUTES

Database is down while scaling is happening

ADWC

SECONDS

Database remains active while scaling is happening

TESTING APPROACH

Utilizing an existing cloud based analytics application called PRETT [Platform Resource Enablement Tracking Tool] running on OACS [Oracle Analytics Cloud Service]. Data will be replicated in DBCS and ADWC to provide a real life application usage experience

The data will then be extrapolated and expand based on that existing application to simulate ADWC functionality.

SPRINT 1 BASELINE

- Compare like to like data volume in OACS[DBCS] to OACS[ADWC]
- 3 Month Data volume
- Run and compare performance in OACS[ADWC] and compare with baseline OACS[DBCS] information

SPRINT 2 EXTRAPOLATE

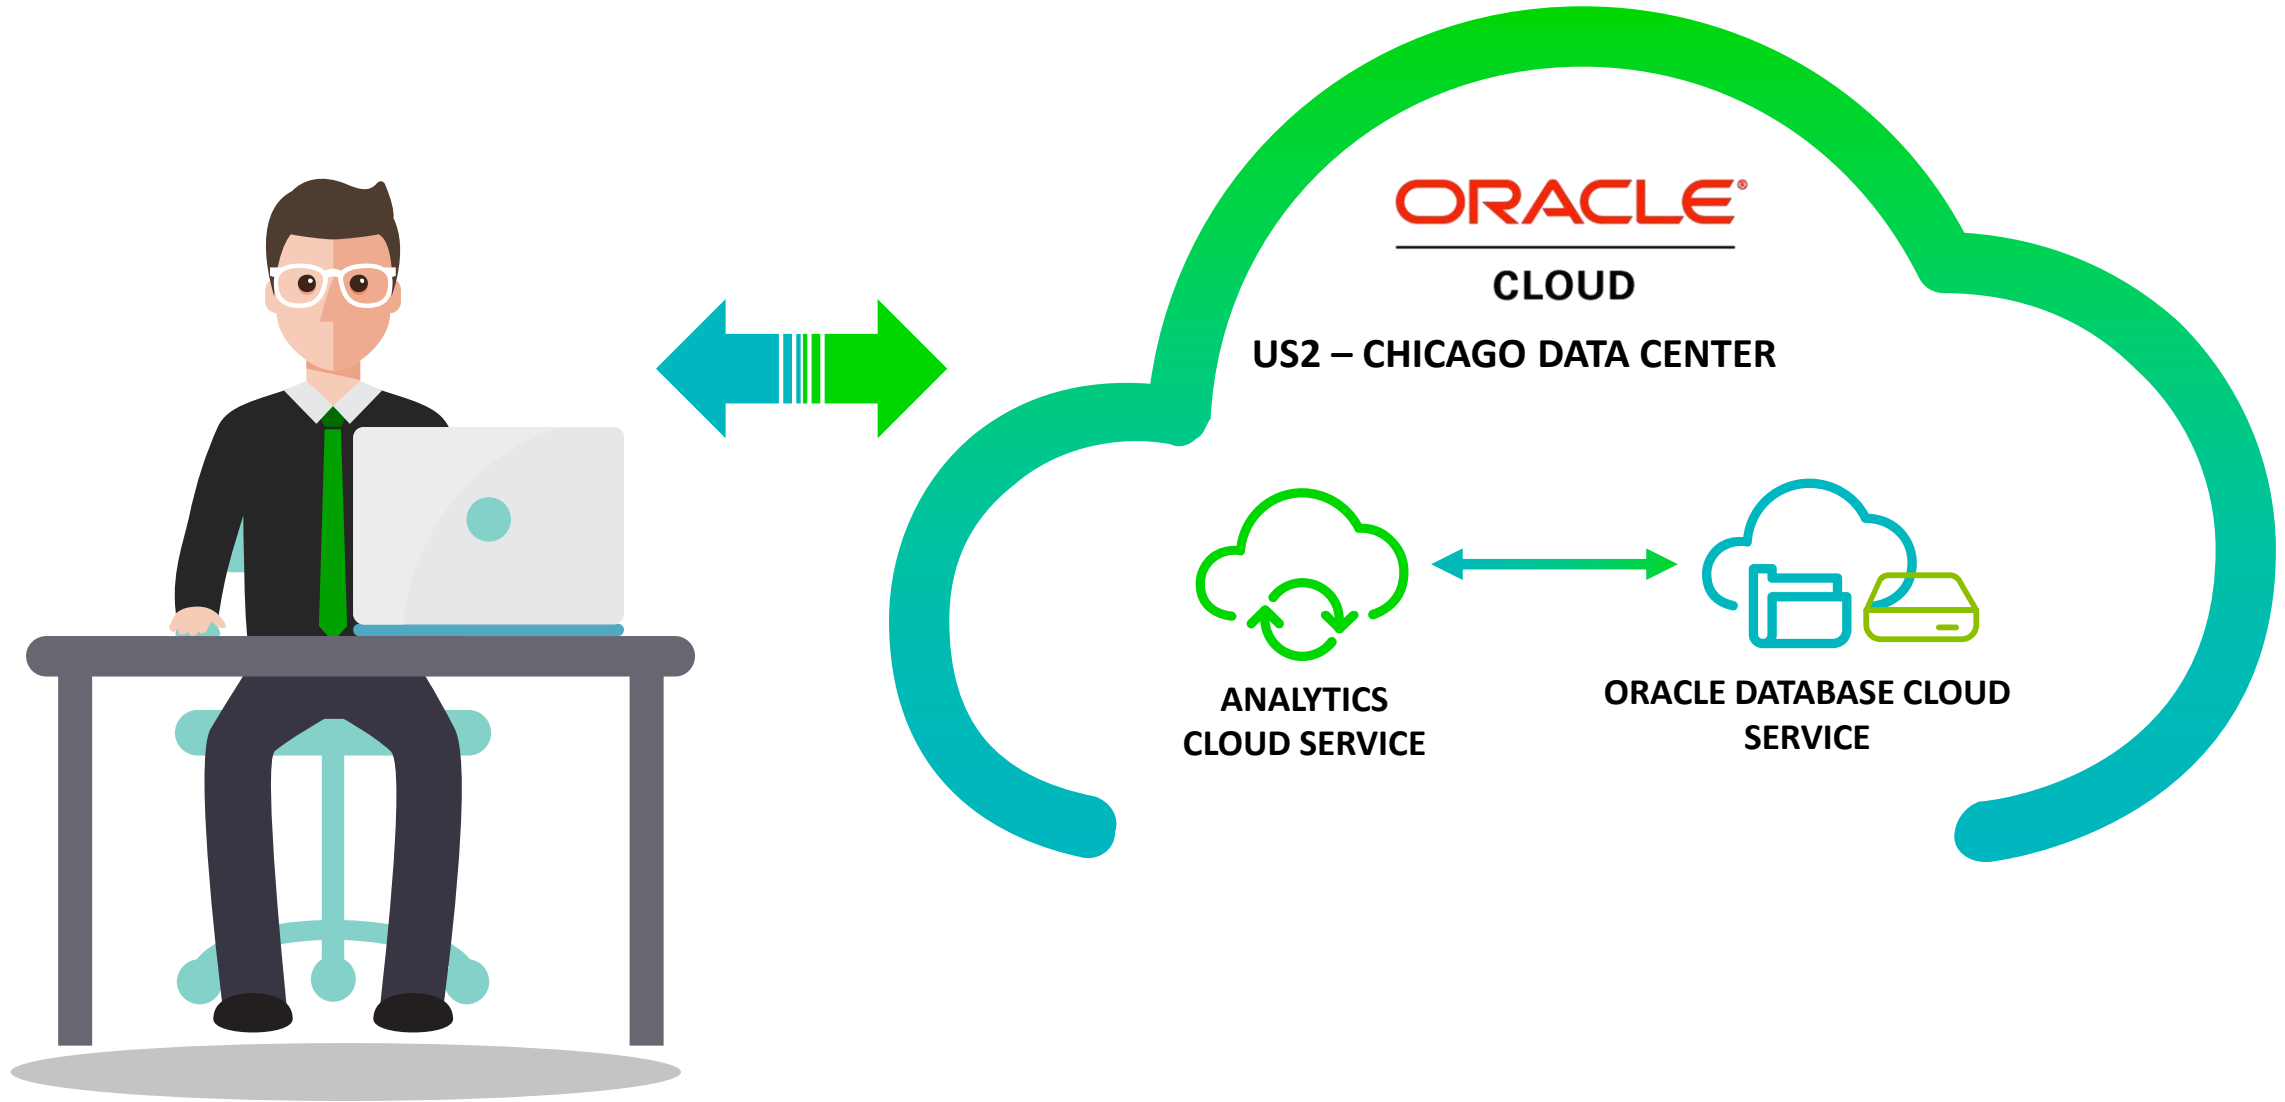

- Create 9 years of data on ADWC based on the 3 month live data to then compare performance on high volume data.

TESTING RESULTS

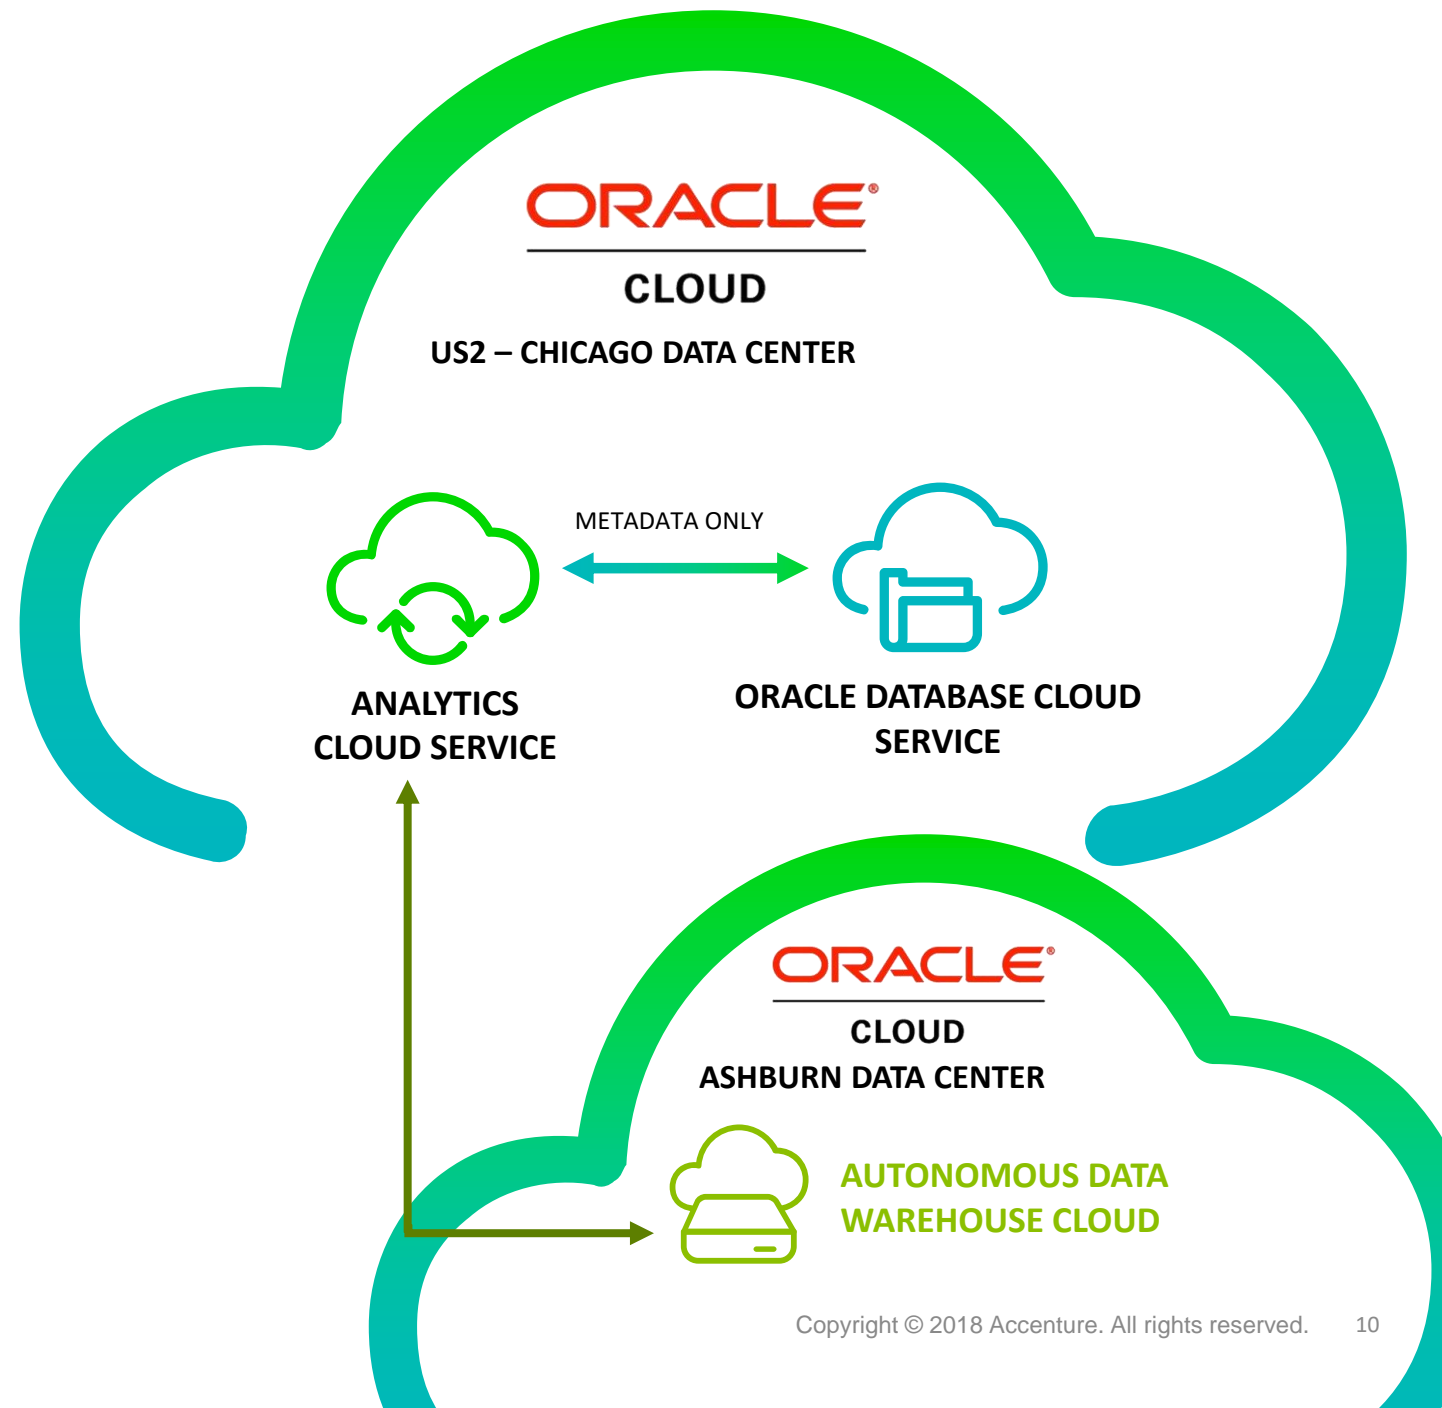

**ADWC IS
CONSISTENTLY
PERFORMING
FASTER**

ORIGINAL ARCHITECTURE

ARCHITECTURE USING ADWC

Super Fast System with Reduced DBA Dependency

Company Overview

Accenture is a leading global professional services company, providing a broad range of services and solutions in strategy, consulting, digital, technology and operations. Combining unmatched experience and specialized skills across more than 40 industries and all business functions—underpinned by the world’s largest delivery network—Accenture works at the intersection of business and technology to help clients improve their performance and create sustainable value for their stakeholders.

Benefits

- Reduce reliance on DBAs for operational areas
- Having limited budget to build/support application, reducing the need for a dedicated DBA is a benefit
- Minimize the need to remember to apply patches ensuring database is secured
- Better performance for the application

Solution Overview

Developing an analytics application running on OACS and ADWC

- To assure end user adoption of the application, architecting for maximum performance and efficiency with autonomous database technologies
- The application determines how efficient our people enablement programs in getting our employees job-ready to be effective in their assignments.
- This system will eventually be used as insights to improve the process and eventually predict future enablement needs for various skills needed for future assignments.
- Data comes from various sources like bench data, training data, skills data, project assignment data.

Quote

“We are at the dawn of the intelligent, autonomous age and having a **self-driving database** is a natural progression. Freeing DBAs from the basic operational nuances of running a database is of tremendous value. I feel that **autonomous databases** will become ubiquitous in the future”

Clark A. Kho , Senior Technology Architect, Accenture

“ADWC is super fast compared to other similar systems!”

Julian Dontcheff, Managing Director – Accenture Technology, Oracle Global Technology Lead

ORACLE®

A Venn diagram consisting of three overlapping circles. The top circle is labeled 'Platform', the bottom-left circle is labeled 'Applications', and the bottom-right circle is labeled 'Infrastructure'. The circles overlap in the center, creating a central region where all three layers intersect. The background is a gradient of red and orange, with a large white diagonal stripe on the right side.

PREDICTION:

60% OF THE I.T. JOBS HAVE NOT BEEN INVENTED YET (BUT WILL BE BY 2025)

- AI changes the **productivity equation**.
- Automation addresses more complex and time consuming problems.
- Automation will not replace all jobs but will invent new ones.

New Jobs in 2025

- Data professional (Analyst Scientist, Engineers)
- Robot Supervisor
- Human to Machine UX specialists
- Smart City Technology Designers
- AI-assisted Healthcare Technician

ORACLE®

Fusion Cloud: Enterprise Cloud Applications
Complete and Integrated Suites: ERP, SCM, HCM, CX

Fusion Cloud Applications – Secure & Extensible
Built on Generation 2 Cloud Platform with Machine Learning

Fusion Cloud Applications: Huge Productivity Gains
Because it's Built on Modern Machine Learning Technology

- **Business Automation: Latest Information + Huge Productivity Gains**
 - Automatic Continuous Daily Close: Consolidations across all subs and currencies
 - Automatic Performance Management: Budget versus actuals compared every day
 - Automatic Document Capture: Paper documents scanned with near 100% accuracy
 - Automatic Fraud Detection: Inspect invoices, expenses... for data anomalies
 - Automatically optimizes your supplier payments and cash positions
 - Automatically finds your best performing employees
 - Automatically finds your best employee candidates

The Oracle logo is displayed on a white podium. The logo consists of the word "ORACLE" in a bold, sans-serif font, with a registered trademark symbol (®) to its upper right. The podium is positioned in front of a man speaking at a conference.
