

# Embrace the Future with certainty

Experience the first and only true unification of Finance and Risk, by partnering with Oracle to take control, to overcome legacy challenges, to see, decide and act on insight faster – and to make your bank more ready for the future.

## Can you be best in class?

Do your finance solutions support business change?  
Only **48%** of banks say they do...

Are your systems of record truly integrated? Just **69%** of banks agree...

Can you produce reports or drive strategic policy?

Collect and automate data to accelerate performance?

## What will Agile Finance and Risk give you?

Secure and continuous innovation...

*Secure services for all areas, enabling certainty of capability and ongoing innovations*

...across every function

*Unified and integrating Finance and Risk data*

...at every level of depth

*Supporting insight, management, compliance and performance*

**Total performance compliance and cohesion across your business**

## Can you do everything you need to?

- Drive end-to-end growth and optimize performance?
- Converge F&R data for a real-time picture of regulatory compliance?
- Accelerate your business with AI, blockchain and robotic tools?

What if you could deliver 50% productivity increases without constraining speed or security?

Most finance functions can't achieve this; what can you do to ensure yours can do more?

## Get new outcomes, with certainty...

### Certainty of more rapid, scalable infrastructure and better TCO

- Scalable solutions
- Fast delivery and ROI
- Improved best practice & compliance

### Certainty of a more flexible, futureproof and high-performing bank

- Better command and control across F&R
- Seamless unity, reduced gaps across functions
- More relevant partnership and ecosystem
- More relevant innovation and progress
- Higher levels of business agility and adaptability
- More provable outcomes and impact

## A technology partner to help you do more

### The most relevant digital innovation

Constant improvements through AI, IoT, and Blockchain

### The only truly unified Finance and Risk model

A single layer of calculation and reporting across your business

**The most complete data mastery** Harmonized data across all levels and functions

### Strength, depth and completeness in cloud

Create and deploy business-accelerating F&R cloud services

## We can accelerate your digital banking ambition

Leverage Oracle's difference, helping modern CFOs to guide their organization into the future, with certainty.

**The highest level of process connectivity**
