Bring a full public cloud experience on-premises

Oracle Dedicated Region Cloud@Customer

Properties:
- Security-first design: Security is built into every service and every cloud platform. You own the data in a cloud environment.
- Run workloads as is: Multi-tenant, unmodified software and hardware are supported in a dedicated cloud environment, and you can bring your own applications.
- Gain full public cloud features and benefits: Get the cost and pricing advantages, management tools, and features provided by Oracle Cloud Infrastructure.
- Pay only for what's used: Pay for resources based on usage, making it easy to manage costs and scale as needed.
- End-to-end support: Oracle is responsible for managing the end-to-end cloud infrastructure, including hardware, software, platform, and SaaS applications.
- Achieve consistent performance: With Oracle Dedicated Region Cloud@Customer, customers own and manage the cloud, ensuring consistent performance and reliability.

Benefits:
- Oracle Dedicated Region Cloud@Customer brings the full cloud experience on-premises.
