Reach your most valuable customers and prospects this holiday season

Heading into the holiday season, it’s critical for retailers and brands to reach and convert high-value shoppers. Why? Because heavy buyers, the top 20% of shoppers, deliver over 70% of sales in retail.

Looking into Oracle Advertising’s retailer coop, we see that heavy buyers spend 12x more than light buyers while shopping more often and spending more on each visit. For example, heavy luxury women’s apparel buyers take 8x more trips and spend 3x more per trip than light buyers.

Leveraging these specific category insights can help brands plan their advertising and marketing strategies. They also power the purchase-based audiences that help you reach those most critical high-value shoppers, both those who shop online as well as those who shop in-store.

But relying on past behaviors is not the only way to reach your target audience. It’s also important to engage individuals in the active shopping mindset - people researching online for upcoming shopping trips to the store and those ready to add to cart on the spot. We do this through contextual intelligence. While gift-giving is top of mind for many during the holidays, other relevant topics that trend during the season include home entertaining, cooking, travels, holiday décor, and more. With contextual targeting segments you can place your ads within this relevant content online.

Oracle Activation helps you reach people who matter most to your holiday campaigns

Oracle’s activation products enable you to combine people data with real-time trending content to build a complete view of your consumers.

Oracle Audiences
Find your intended audience nearly anywhere they engage online through more than 200 integrations into DSPs, social platforms, commerce platforms, OTT, streaming audio, and more.

Reach your most valuable customers and prospects this holiday season

New merchant category audiences

The best predictor of future behavior is relevant past behavior. That’s why purchase-based audiences routinely deliver the strongest ROI when trying to drive sales and acquire new customers.

Oracle’s new Merchant Category Audiences are built at the purchase transaction level, aggregating spend across payment method and merchants to capture a comprehensive view of consumer shopping behavior. These modeled audiences are sourced from over 50,000 merchants and $1 trillion in annual spending, helping you to reach your most valuable customers and future prospects during this holiday season.
