**Safety Cloud**

Detect risks earlier, automate processes, and increase compliance with unified multivigilance.

---

**PLATFORM AT A GLANCE**

- **#1** in safety case management with Argus and in safety signal management with Empirica means less risk for you as a customer.
- **3 out of 5** companies use Oracle safety software.
- **50%** reduction in overall case processing time with Safety One Intake.
- **120+** new Oracle safety customers in the last 5 years.
- **300+** years of experience in the Oracle safety team.
- **750+** Oracle Safety Consortium members.

---

**DETECT EARLY**

- Detect safety signals early in your clinical trials with Empirica Study and in post-marketing spontaneous data with Empirica Signal.
- Empower your business users with immediate insights into operational risks and patient data in Argus Enterprise Edition using powerful, flexible analytics.
- Prioritize and manage your signals with Empirica Topics to avoid recalls, lawsuits, regulatory penalties, and inspection findings.
- Accelerate your case processing with Safety One Intake, allowing downstream aggregate analyses and periodic reports to run sooner.

---

**AUTOMATE PROCESSES**

- Harness the AI power of Safety One Intake to automatically structure and ingest your safety source documents, significantly easing the pressure of increasing caseloads.
- Optimize your case management workflow using built-in features in Argus to automate routine steps and reduce manual work, cutting down your processing times by 50%.
- Reduce the amount of work for your signal evaluators in Empirica by employing a smart user interface and algorithms that curtail false positives.
- Bring down your total case of ownership with Oracle Safety Cloud – integrating Argus, Empirica, and Safety One Intake for end-to-end multivigilance in a SaaS model.

---

**INCREASE COMPLIANCE**

- Ensure global compliance with Argus for your aggregate and expedited reporting via E2B(R3), E2B(R2), eVAERS, eMDR(R2), MIR, and more.
- Use Oracle Safety Cloud to comply with HIPAA, 21 CFR Part 11, and multivigilance requirements for pre- and post-market data analyses, vaccines, devices, and combination products.
- Move cases through your workflow twice as fast with Safety One Intake, expediting on-time ICSR delivery to health authorities.
- Employ Empirica to comprehensively SARB signal management regulations such as EU GVP Module IX and FDA IND safety reporting guidelines.

---

**ORACLE SAFETY CLOUD** offers the industry’s broadest platform of integrated systems and workflows to drive greater compliance and data insight while automating processes.
