

SD-WAN Technology Makes a Network More Efficient and Dynamic

Simplified management and operation

Increased availability, reliability and agility

Reduced costs

More visibility and security

It's Time to Rethink Your Network

The Oracle SD-WAN Advantage

Application

providing end to end quality experience

Failsafe Network Automation

delivering self-driving self-healing capabilities

Security

for the next level of protection

Multi-Cloud

management with optimal access

Benefits

- Increase QoE with dynamic traffic management
- Failsafe network automation for actionable network intelligence
- Secure connections for applications, users and data
- Multi-cloud access, management and visibility
- Lower cost; more bandwidth
- Per packet, real-time, self-healing, self-driving networks decreases need for additional operational resources.

Ready to supercharge your network?

Oracle SD-WAN is proven to offer global enterprises worldwide:

1. Smoother transition to the cloud
2. Cost savings
3. Increased customer and employee satisfaction

Supercharge Your Network with Oracle SD-WAN

Successful businesses are driving automated intelligence into the network:

69% of enterprises are moving business-critical applications to the cloud

Customers, employees and partners shifting to plug-in work

Dispersed data and applications

A Network Without SD-WAN Can Face:

More downtime. More expenses.

Outages lasting **1 hour** can cost **\$300K+**

Cost of downtime cited **\$5,600 for every minute**

Costs add up.

1 in 3 organizations – 34% – say the cost of a **single hour of downtime can reach \$1M to \$5M+**

96% of enterprises face costly IT outages... though IT says **51% of downtime is avoidable**

Downtime also hurts customer experience

73% of U.S. consumers rate customer experience as an **important factor in purchasing decisions**

49% of U.S. consumers say **companies provide a good customer experience** today

~ 5 hours

Only 2% of organizations recover from downtime within 1 hour. Most wait an average of 4.78 hours.

Johna Till Johnson
CEO and Founder,
Nemertes Research

“Trillions of dollars and industry reputations are riding on the performance across networks, but the network itself is hard to control. This is leading to the development of new technologies that deliver a high-quality end-to-end experience.”

The Benefits of SD-WAN

Companies that converted 90%+ of their sites to SD-WAN see measurable improvements:

reduction in WAN resources **20%**

time reduction in WAN staff troubleshooting **33%**

time reduction a typical site is off the network in a year **69%**

reduction in the length of individual incidents **80%**

SD-WAN has become the most disruptive network technology on the market today
