Misconceptions and claims:	For the Record:
Misconception on ideal customer: "Textura is built primarily for large construction companies and major projects, limiting its fit for smaller contractors and jobs."	**Fact: GCs of various sizes use Textura** From small jobs to billion-dollar capital programs, Textura delivers a complete, connected, and trusted construction payment management solution. Textura helps organizations control financial risk, improve cash flow, automate compliance workflows, and improve operational efficiency.
Misconception on price: "Textura can be expensive compared to other solutions."	**Fact: Textura is competitively priced** Textura costs roughly the same as other systems, while provides high value capabilities. One valuable function is that it works with your existing bank to create ACH files as you would from your ERP. And you don't pay upfront, but are billed as you add projects to the system.
Misconception on functionality: "Textura lets you create, send, and track lien waivers and uses DocuSign for electronic signatures but requires in-house notarization."	**Fact: Textura does more than payments** Textura does payment processing invoice and lien waiver compliance management, reporting and analytics, supply chain management, electronic signature, and notary features. The notary does not need to belong to the signer's organization or be assigned to the project.
Misconception on customer success: "Implementation takes a long time, integration is challenging and support is slow to respond."	**Fact: Customers love our client services team** Implementation timelines vary based on configuration and customer requirements, project planning, system and data preparation, testing, and user readiness activities to support a smooth onboarding. Oracle's client services team provides support throughout implementation.

CUSTOMER SUCCESS

"Textura is more mature than other products on the market And we found the Textura support to be EXCELLENT."
