

ClearTrial

Advanced Visibility for Optimal Clinical Trial Planning

Inadequate trial budgets, reduced timelines, and increasing demands on fewer resources make trial planning more difficult than ever. Inaccurate forecasts can leave organizations floundering, or worse, they can set unachievable study goals. What if you could reduce your trial planning time by 80% and still deliver accurate, on-time, and achievable forecasts by leveraging industry benchmarks?

Accelerated Clinical Trial Planning

It typically takes weeks to even months to plan clinical studies. Disparate and manual planning and budgeting tools take significant time and effort to use, often resulting in inaccuracies and study start delays.

Oracle Health Sciences ClearTrial Cloud Service can reduce the end-to-end planning process from weeks to hours by providing visibility into industry-standard, detailed tasks, timelines, costs, and resources. It also offers quick insights into potential budget and resources so you can plan with precision.

- Accurately produce ballpark budgets in minutes, instead of days.
- Quickly create and evaluate multiple study scenarios.
- Easily generate study requests for proposals (RFPs) directly from project plans.

Accurate, Defensible, and Achievable Study Budgets

Today, the pressure caused by the rise of complex trials, stagnant finances, and limited personnel has resulted in increased study planning cycles, inflated budgets, extended timelines, and continuous vendor change orders.

ClearTrial provides visibility into the operational and financial planning for a study and the ability to model new scenarios quickly, as clinical assumptions or business requirements change.

- Quickly develop ballpark budgets, detailed forecasts, and operational plans.
- Accurately plan with embedded global clinical intelligence.
- Effectively negotiate fair market value with industry benchmarks.

“The product is intuitive to use and makes clinical trial forecasting easy and more accurate than I thought possible...Conducting clinical trials is one of the biggest expense categories for biopharmaceutical companies. Better forecasting leads to better asset management.”

Shortened RFP and Bid Management Cycles

ClearTrial helps to gain efficiencies by cutting planning time for outsourcing in half.

- Compares proposals to each other or against industry standard rates.
- Leverages benchmark pricing for optimal negotiations.
- Reduces contract and negotiation cycle times.

ClearTrial saves time and money by enabling you to plan, forecast, and outsource clinical trials quickly and accurately.

Use ClearTrial for:

Ballpark Budgeting

Create rapid, accurate, clinical trial budget and resource estimates with only a few, key trial assumptions.

- Generate detailed operational and financial plans.
- Understand long-term budget and resource needs with cross-portfolio views.
- Model economies of scale and risk for: in-licensing, out-licensing, and M&A.

Benchmarking

Optimize trial planning and outsourcing by comparing multiple trial scenarios using a “bottoms-up” approach with embedded global clinical intelligence and industry-proven, costing algorithms for 160+ therapeutic indications in over 90 global locations.

- Assess the impact of clinical assumption changes by modeling “what-if” scenarios.
- Create RFPs and export to Excel to receive quality vendor bids.
- Compare bids against each other and/or benchmarks for a single or multiple RFPs.

Precise Budgeting

Create detailed, precise, budget forecasts with the flexibility and configurability to align with your custom work breakdown structure (WBS) and organizational hierarchy.

- Configure templates with detailed tasks, resources, rates, and calculations.
- Align trial plans with internal or negotiated vendor tasks and timelines.
- Monitor and report against actuals more easily.

ClearTrial is delivered as Software as a Service (SaaS) for fast deployment and implementation, easy adoption, low cost of ownership, and rapid ROI.
