ORACLE

Oracle Health Patient Portal

Consumers weigh their overall healthcare experiences in much the same way as they do when banking or shopping for a big-ticket item. When it comes to healthcare, consumers desire convenience, access to their health history, and the ability to communicate directly with their clinical care team. They want convenient tools at their fingertips to help them better engage in their health.

Improve engagement with your population

As consumers continue to expect more from a health system, is your organization poised to meet your population's needs?

The Oracle Health Patient Portal is comprised of engagement tools designed to inform, educate, and connect individuals with their clinical care team. The solution helps empower people to take a proactive role in their care where and when they need it most.

Engage people through a person-centric experience

The Oracle Health Patient Portal features person-centric engagement tools designed to place them at the center of their care. It includes secure messaging between the patient and clinician, direct-book appointment scheduling, the ability to view, download, and transmit lab results, prescription refills, and patient education resources.

Meet patients where they are

The Oracle Health Patient Portal enables people to access education, receive appointment reminders, and have the ability to communicate with their clinical care team.

With the patient portal, people can:

- Participate and receive care through video visits via a desktop or mobile device
- Connect trackable devices to share results with their clinician
- Self-report activities and outcomes so clinicians can track progress in-between appointments
- Complete and reconcile their health history prior to scheduled visits

Key benefits

The Oracle Health Patient Portal is a set of engagement tools designed to help organizations:

- Enhance patient and clinician communication via secure messaging
- Foster better health outcomes through education
- Reduce no-show rates through online scheduling
- Enhance operational efficiencies by reducing manual administrative processes

ORACLE

Help simplify operations and reduce costs

The Oracle Health Patient Portal is designed to help your organization simplify its administrative operations and reduce costs by:

- Promoting operational efficiencies through reduction of paperwork, manual processes, and printing of patient information

- Facilitating time efficiencies for administrative and nursing staff by digitally communicating with patients

- Helping reduce no-show rates through online scheduling capabilities

- Supporting increased patient satisfaction scores by enabling communication through secure messaging and video visits

The Oracle Health Patient Portal helps your organization strategically place the person at the center of their care.
