Introduction

Oracle Hospitality OPERA 5 Property Management is the proven property management system for hotels that want the benefits of Oracle Hospitality OPERA 5 suite at an attractive price. It provides all the capabilities that hotel staff need — including handling reservations, checking guests in and out, assigning rooms, managing room inventory, accommodating in-house guest needs, and performing accounting and billing functions. Available on premise or self-hosted, OPERA 5 Property also offers integration with the Oracle Hospitality solution for food and beverage and other Oracle Hospitality OPERA 5 applications, providing the best possible foundation for your business.

ROBUST PROPERTY MANAGEMENT THAT DELIVERS VALUE

Thousands of hotels around the world use the Oracle Hospitality OPERA 5 hotel management solution to deliver an exceptional guest experience to each one of their customers. With built-in configuration options to meet the needs of hotels of all types and sizes, the OPERA 5 suite is a comprehensive solution for a modern hotel business.

With Oracle Hospitality OPERA 5 Standard, hoteliers can choose up to 55 Oracle Hospitality OPERA 5 functions to maximize operating efficiency while enhancing service. Smaller properties with simplified operations can choose OPERA 5 Lite which comes with 30 functions. Complex properties can choose OPERA 5 Premium which comes with all available functions.
CONSISTENTLY DELIVER EXCEPTIONAL GUEST EXPERIENCES
With its powerful database, OPERA 5 helps deliver personalized experiences to all guests, recording their preferences that hotel staff can quickly access whenever they return.

MAXIMIZE REVENUES WITH RATE MANAGEMENT
OPERA 5 offers complete rate management functionality to hotels, adapting rates to suit business needs and ever-changing marketplace conditions. From managing complex negotiated rates in business hotels to apartment-style billing for long-stay accommodation, OPERA 5 simplifies rate management, ensuring revenue teams the best tools to meet objectives. The application also makes it easy for reservations teams to identify appropriate rates for customers and cross- and up-selling opportunities to maximize revenues.

CREATE SUCCESSFUL DISTRIBUTION STRATEGIES
Hoteliers today have a broad range of options when it comes to attracting guests: online travel agents, global distribution systems for reaching corporate customers, options for metasearch as well as accepting bookings through their own websites. Managing all these channels and updating rates and availability pose significant challenges; with OPERA 5, it is possible to automate the process to most effectively execute distribution strategy.

INCREASE HOUSEKEEPING EFFICIENCY
By taking advantage of the room management features in OPERA 5, hotel employees can handle all facets of room supervision, including availability, housekeeping, maintenance and facility management.

IMPROVE BUSINESS PERFORMANCE WITH REPORTS
The reporting functionality within OPERA 5 produces insightful reports, incorporating forecasts and historical data to make informed decisions.

INTEGRATE FOOD AND BEVERAGE OPERATIONS
Food and beverage facilities can contribute significantly to revenues. Ensuring that restaurants and bars run efficiently to enhance guest satisfaction and profitability is essential. Oracle Hospitality offers industry-leading point-of-sale and kitchen management solutions that integrate with OPERA 5, providing simplified reporting and billing.

INCREASE EFFICIENCY WITH FULLY INTEGRATED SYSTEMS
OPERA 5 can be integrated with a variety of additional modules and third-party systems to help achieve operational efficiency and minimize manual administration. From applications for event management and loyalty programs to interoperability with leisure and financial systems, OPERA 5 builds an integrated technology infrastructure to support business.

ENGAGE GUESTS WITH MOBILE TECHNOLOGY
Oracle Hospitality OPERA 5 Hotel Mobile makes properties borderless, helping facilitate exceptional service efficiently and in real time. The new mobility front-end solution shifts a range of core functions — such as check-in, housekeeping and maintenance — to mobile devices that staff members can use anytime, anywhere.

KEY BENEFITS
- Deliver outstanding guest experiences all day, every day
- Increase revenues through systematic control of rates
- Maximize occupancy with integrated distribution management
- Create and assign housekeeping sections on demand
- Integrate with food and beverage and other systems for simplified billing and reporting
- Realize the benefits of the Oracle Hospitality OPERA 5 suite while paying only for the features you need
EMPOWER STAFF
To consistently deliver outstanding guest experiences, staff needs access to systems that perform all day, every day and provide accurate customer and hotel information. Oracle Hospitality OPERA 5 is used by thousands of hotels around the world, increasing the likelihood that new employees who come on board will be familiar with the application. That means they can spend more training time on service rather than on systems.

EXPAND WITH MULTI-PROPERTY SUPPORT
OPERA 5 is built for hotel operators that have more than one property, and it has the capability to scale to thousands of hotels worldwide. Hotel groups also have the flexibility of implementing OPERA 5 in their five-star hotels or as the PMS for mid-range and budget brands.

CHOOSE ON PREMISE OR SELF-HOSTED
OPERA 5 is available either on premise or self-hosted. With the on-premise option requires IT expertise at the property and investment in hardware giving you all the features of OPERA 5 and full control over its configuration and maintenance. For multi-property hotel groups that have a data center, self-hosting would reduce overall IT costs and complexity.

REST ASSURED WITH SECURITY AND PAYMENT CARD INDUSTRY COMPLIANCE
As the provider of the world’s most widely deployed hotel management solution, system security is always a top priority. That’s not always the case with other technology vendors. For example, many do not offer compliance with Payment Card Industry standards, which means a lengthy audit process must be completed independently. Working with Oracle Hospitality saves time and money and helps protect brand integrity and reputation.
