Use Case 2: Care Delivery
Data Science on Event / Log Data

Data Sources
(can and will be anything)

- Hospital Applications
- Enterprise Applications
- Software as a Medical Device
- Data Producers
- Imaging
- Wearables/Sensors
- Internet of Medical things

Data Refinery
Batch Processing (Data Flow, Data Integration, PL/SQL, Oracle Data Integrator)

Data Persistence Platform
Object Storage (Object Storage)

Access & Interpretation
Learn (Data Science OML, OML Notebooks)

Data Consumers
Clinicians / Medical Device Users / Caregivers

Applications

Architectural Roadmap

Security, Identity & Access Management
Governance

* All of the Services (Service) depicted above are part of the Oracle Cloud Infrastructure Portfolio
