

Oracle Cloud for Secret and Top-Secret missions

Powering mission scalability, security, and performance

Oracle Cloud is the most open, secure, and complete IaaS, PaaS, and SaaS cloud solution that is built from the ground up to meet the mission-critical needs of the United States Intelligence Community and Department of Defense. Secure by design, Oracle Cloud and its accompanying cloud hardware are built to eliminate security threats inherent to most existing cloud solutions, freeing IC and DoD users to innovate for the needs of now while safeguarding sensitive workloads.

Oracle Cloud for Secret and Top-Secret missions combines Oracle's time-tested strengths with modern, cloud-native capabilities today's agencies crave.

Time-tested strengths

- Database
- Exadata
- SaaS applications
- Bare metal systems
- Low-latency networking

Cloud-native capabilities

- Pay-for-use
- Scalability
- Containers
- Serverless deployment
- Hybrid infrastructure

Unlock mission potential with Oracle Cloud

Multi-cloud and data interoperability

Open and vendor-agnostic principles preserve user bargaining power and technical control.

Cybersecurity and network virtualization

Unmatched governance and security controls combined with network virtualization ensures performance and increases security by greatly reducing the potential attack surface.

AI, machine learning, and autonomous services

Ready-to-build AI platform empowers data scientists and application developers to rapidly build, deploy, and manage AI-powered solutions.

Data integration and movement

Capabilities ensure real-time accuracy, consistency, and management of data across complex systems.

High performance computing

On-demand HPC infrastructure expedites mission-critical intelligence with an integrated low-latency, high-throughput, and hyperscale architecture.

Industry partnerships

Deep technical alliances with Microsoft and VMware provide swifter migrations and seamless interoperability.

About the Oracle National Security Group

Oracle National Security Group (NSG) serves as a valued partner the US intelligence community by providing innovative technology to enable the world's most advanced intelligence missions. Our team is comprised of US citizens, most with TS/SCI clearance and sourced from our customer community, with deep mission knowledge and cloud expertise. Oracle NSG reports to Larry Ellison, Oracle founder, CTO, and chairman of the board. Our unique positioning within the organization allows our customers to fully leverage Oracle's deep expertise and resources to ensure mission success.
