G2 recognizes Oracle Linux as a Leader in Operating Systems.

1. Increases IT agility and efficiency - reduces complexity

“Oracle Linux is very useful for long-term usage because of its pricing plan and it is very cost-effective as compared to other cloud VM providers.”

G2 Reviewer, QA Cybersecurity Engineer, Civic & Social Organization

“Since the OS is designed specifically for running a database instance and its services, everything is more streamlined, robust, reliable and the performance is as good as it gets.”

G2 Reviewer, Director/CISO, Higher Education

2. Increases IT security - reduces risk

“High reliability and security. Managed feel to work with Oracle products. It will improve security, reduce downtime, simplify operation and much useful in our daily task.”

G2 Reviewer, Data Analyst, Management Consulting

“Oracle is the best Linux I have used in cloud and it gives better performance and high security for web servers and also it’s the best os for running web servers.”

G2 Reviewer, Information Technology Team Lead, Computer Software

3. Increases performance and reliability

“Stability and reliability are the two main requirements for the services we provide. So far we are happy with Oracle Linux. This OS also provides virtualization features along with security hardening.”

G2 Reviewer, EPC Team Leader, Telecommunications

4. Saves money - reduces infrastructure cost

“The best part of oracle linux is their support team which is far better than redhat support. And moreover its cheaper and we are also planning to use oracle cloud computing for future business plan.”

G2 Reviewer, Senior Software Engineer, Computer Software

“Whether you are an SME or a large enterprise, using Oracle Linux has many advantages being affordable and scalable for a variety of environments.”

G2 Reviewer, Director/CISO, Higher Education

Oracle Linux provides a 100% application binary compatible alternative to Red Hat Enterprise Linux and CentOS Linux and is supported across both hybrid and multicloud environments.
